Improvements in the Reference Manual and the THtml doc generator

Monday, 26 March 2007 11:30 (20 minutes)

ROOT's documentation system has been renovated a bit. We will show what the new ingredients are, how they work, and how you can document your own libraries with THtml, including customized layout, module documentation, and cross-library referencing. We will also present some of THtml's tools that can help write better code.

Presenter: NAUMANN, Axel (CERN/SFT)
