To whom it may concern,

The 2024 International School of Trigger and Data Acquisition (ISOTDAQ 2024) will take place in Hefei, China, hosted by University of Science and Technology of China (USTC) from Jun. 19 to Jun. 28, 2024. As the chair of ISOTDAQ, I would like to invite you to attend this school from Jun. 19 to Jun. 28, 2024 for 10 days.

ISOTDAQ 2024 is the 14th of a series of International Schools dedicated to those students with an education in physics, engineering or computing (ranging from undergrads to postdocs) and meant to introduce the "arts and crafts" of triggering and acquiring data for physics experiments. The main aim of the school is to provide an overview of the basic instruments and methodologies used in high energy physics, spanning from small lab experiments to very large LHC experiments, emphasizing the main building blocks as well as the different choices and architectures at different levels of complexity. The school will be split 50%-50% between a series of lectures and hands-on laboratory exercises, where students can use the concepts and techniques they have learned throughout the course. For more details about the ISOTDAQ 2024, please visit: <https://indico.cern.ch/event/1337180/page/31292-welcome>. Your home institute and by default, yourself will cover travel expenses and social insurance.

I would appreciate it very much if you accepted this invitation. I am looking forward to meeting you in USTC. Please let me know in case you have any questions.

Yours sincerely,

Zhengguo ZHAO
Professor, USTC
Chair of Local Organizing Committee for ISOTDAQ 2024
