

## ISOTDAQ 2024-International School of Trigger and Data Acquisition

ISOTDAQ 2024 is the 14th of a series of International Schools dedicated to introduce those with an education in physics, engineering or computing (ranging from undergrads to postdocs) to the "arts and crafts" of triggering and acquiring data for physics experiments. The main aim of the school is to provide an overview of the basic instruments and methodologies used in high energy physics, spanning from small experiments in the lab to the very large LHC experiments, emphasizing the main building blocks as well as the different choices and architectures at different levels of complexity. The school will be split 50-50 between a series of lectures and hands-on laboratory exercises, where students can use the concepts and techniques they have learned throughout the course.

The 14th International School of Trigger and Data Acquisition is organised by CERN and University of Science and Technology of China (USTC).

### Tuition Fee

The fee is 575 CHF and covers:

accommodation in shared rooms from 18th June to 29th June, a total of 11 nights, including breakfast. The dates of the school are 19 to 28 June.

coffee breaks during the days of lectures,

lunch during the days of lectures,

a welcome reception and

a social dinner.

Travel to and from Hefei, as well as all other dinners and expenses are to be paid by the students.

Students wishing to stay in a single room will have to support the cost (+300 CHF).

For a limited number of applicants who do not have any means of finance from their home institute, the tuition fee might be reduced or waived by the organizers. In case you want to apply for this, please attach a justification to your application.

The fee for local students or those not requiring accommodation is 260 CHF.

### Payment method

Payment of the tuition fees can be made via bank transfer. More details will be provided to accepted students after we receive confirmation of acceptance.
