

Computing and Astroparticle Physics - 2nd ASPERA Workshop - hosted by Port d'Informació Científica (PIC)

Monday, May 30, 2011 - Tuesday, May 31, 2011

Casa Convalescència, Barcelona

Scientific Program

PLEASE SEE THE TIMETABLE FOR ALL THE DETAILS OF THE SESSIONS. The workshop is conceptualized as a dialog between Models for Computing and Data Pipelines for astroparticle projects and Technologies for Data Processing and Computing. We call the "actors" of this second workshop the "Modellers" and the "Technologists". A novel feature we will try out in this workshop is to have Parallel sessions on Models with rapporteurs who are Technologists, and viceversa, sessions on Technologies with rapporteurs who are Modellers.

The workshop will have invited summary and rapporteur talks, as well as short presentations in the parallel sessions which participants should propose by sending an email to atrilla@pic.es

Given the structure of the workshop, the following two tracks have been defined. PLEASE SEE THE TIMETABLE FOR ALL THE DETAILS OF THE SESSIONS.

Models for Computing and Data Pipelines

Technologies for Data Processing and Computing
