Disk and Tape evolution in the Exabyte-scale era

Monday 30 September 2024 16:00 (30 minutes)

Disk and tape technology are continuously evolving. Rucio relies on multiple storage technologies to accommodate the data deluge from different scientific endeavors. In this talk, we'll deep dive into two storage technologies developed at CERN: EOS (disk media) and CTA (tape media), and we'll give an outlook on the current trends behind these media and what the market looks like.
