Data Challenge 2024 Retrospective

Monday 30 September 2024 16:50 (20 minutes)

The Data Challenges are major orchestrated tests in preparation for the High-Luminosity LHC (increase by a factor of ten), with the participation of all stakeholders (multiple experiments and their data-management services, sites, networks). The second Data Challenge was conducted in February 2024. This talk will offer a summary of DC24, its goals and its achievements, with a focus on the takeaways for Rucio.
