

7th-12th July 2024,
University of Innsbruck

EARLY CAREER CONFERENCE IN TRAPPED IONS 3rd edition

https://indico.cern.ch/e/ECCTI_2024

ECCTI is intended to connect a broad community with very **diverse scientific goals** with **common technical challenges**. We invite graduate students and early career researchers (within 5 years of completing a PhD) to share their cutting edge work with trapped ions with a global audience.

Why attend? Engage in fruitful discussion shaping the future of physics. Connect with potential colleagues, broaden your perspectives and partake interactive sessions to develop skills essential for a successful career in research or industry!

- Atomic Clocks
- Antimatter
- Nuclear physics
- Molecular spectroscopy
- Quantum information
- Quantum computing
- Precision spectroscopy

>100 participants from the different fields

Nobel laureate lecture by **David Wineland**
