

## Chicago in the Spring: A Proposal for the 29<sup>th</sup> IPPOG Collaboration Meeting

Spencer Pasero

16<sup>th</sup> IPPOG Collaboration Board Meeting

24 April 2024

# Why Fermilab?

Fermilab has hosted one previous IPPOG meeting (2013). Why go back?

- Hub for U.S.-based Masterclasses
- Home for QuarkNet cosmic ray program (partner for Global Cosmics)
- Lead institution for DUNE & for U.S. neutrino program (IPPOG priority)
- Major renovations & updates to Lederman Science Center since last IPPOG visit
- Spring in northern Illinois! (maybe not)
