

Session Program

4-8 Dec 2023

Zimanyi Winter School

Diffraction

Monday 4 December

16:25

Diffraction

Session | Location:

16:25-16:45

Possibilities for phase and source function reconstruction in HBT correlations and in elastic proton-proton scattering

Speaker

Tamas Csorgo

16:45-17:05

Detailing the Odderon effect with numerical examples at 8 TeV

Speakers

Andras Ster, András Ster

17:05-17:25

Nonresonant central exclusive production from CMS+TOTEM

Speaker

Ferenc Siklér

17:25-17:40

Dip-bump structure in pp single diffraction

Speaker

Istvan Szanyi

17:40
