CTA Outook and Roadmap

Tuesday, 19 March 2024 12:00 (15 minutes)

CTA software development is primarily driven by the needs of the CERN experimental programme. Looking beyond Run-3, data rates are set to continue to rise exponentially into Run-4 and beyond. The CTA team are planning how to scale the software and service to meet these new challenges.

CTA is also driven by the needs of the community outside CERN. The landscape of tape archival for scientific data is consolidating, and CTA is constantly adapting to a wider range of use cases.

This talk will present the short-term and medium-term roadmap for CTA development and new features.

Primary author: DAVIS, Michael (CERN)

Presenter: DAVIS, Michael (CERN)

Session Classification: CTA Development and Roadmap

Track Classification: Plenary Sessions
