

RADNEXT outro

Rubén García Alía (CERN)

GB-RADNEXT Workshop

12-13 June 2024

<https://indico.cern.ch/event/1353707>

The logo for RADNEXT is displayed in a stylized, blue, sans-serif font. The word 'RAD' is on the top line, and 'NEXT' is on the bottom line. The letter 'X' in 'NEXT' is uniquely designed, featuring a circular element with a spiral pattern inside, resembling a particle detector or a lens.

This project has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No 101008126

The very clear added value of the G(B)-RADENEXT workshops

- It is impressive how much I (and surely many others) am hearing about the pertinence of this workshop, and the importance of exchanging and discussing about the topics it covers, typically not included in other events, which it complements very nicely
- We do not (yet) know how RAD(NEXT)² will look like but, certainly, it will either “not be”, or it will orbit around many of the subjects covered in these workshop (facility and user needs and related prospects, emerging challenges in radiation effects testing, guidelines for alternative methodologies, etc.)
 - All this (hopefully) in addition to a continuation of the EU funded transnational access beam time
 - The good news for now is that we have RADNEXT beam until May 2026

RADNEXT
2026

Warm thanks to the local team! (plus the GB-RADNEXT organizers: Ennio, Gerd, Francoise, Pablo...)

Other good news is that you do not need to wait for G(X)-RADNEXT 2025 to continue discussing about these topics...

Thematic Workshop

Present and Future of SEE Testing: Facilities and Methodologies

Monday, 16th September

Thematic Workshop Co-Chair

Arto Javanainen

University of Jyväskylä (Finland)

Thematic Workshop Co-Chair

Gerd Datzmann

Datzmann interact & innovate (Germany)
