PyHEP.dev workshops

Indico for the 2023 workshop

PyHEP.dev is an in-person, informal workshop for developers of Python software in HEP to plan a coherent roadmap and make priorities for the upcoming year. It complements the PyHEP Online workshop, which is intended for both developers and physicists.

- Series of HSF workshops part of the PyHEP WG activities
- .dev: new workshops since 2023 complementing the "good old" PyHEP "users" workshops, held since 2018 and online since 2020.
- Planning/coordination meeting for *developers* of HEP software in Python.
- Jul 25–28, **2023** at Princeton (hosted by IRIS-HEP, 38 participants).
- Aug 26–30, **2024** in Aachen (IRIS-HEP & ErUM-Data-Hub, targeting 40–50). Advert soon …
- Preparation: participants set goals for themselves in GitHub Issues, starting a month before the workshop, and followed up on these plans during and after the workshop.
- Format: introductory (lightning) presentations followed by discussions in topical groups.
- Result: minutes taken here. The 2024 edition will also have a formal conclusions document.
