

KREONET and Korean NREN status and evolution

April 17, 2024

Buseung Cho

Director of KREONET Center
KISTI

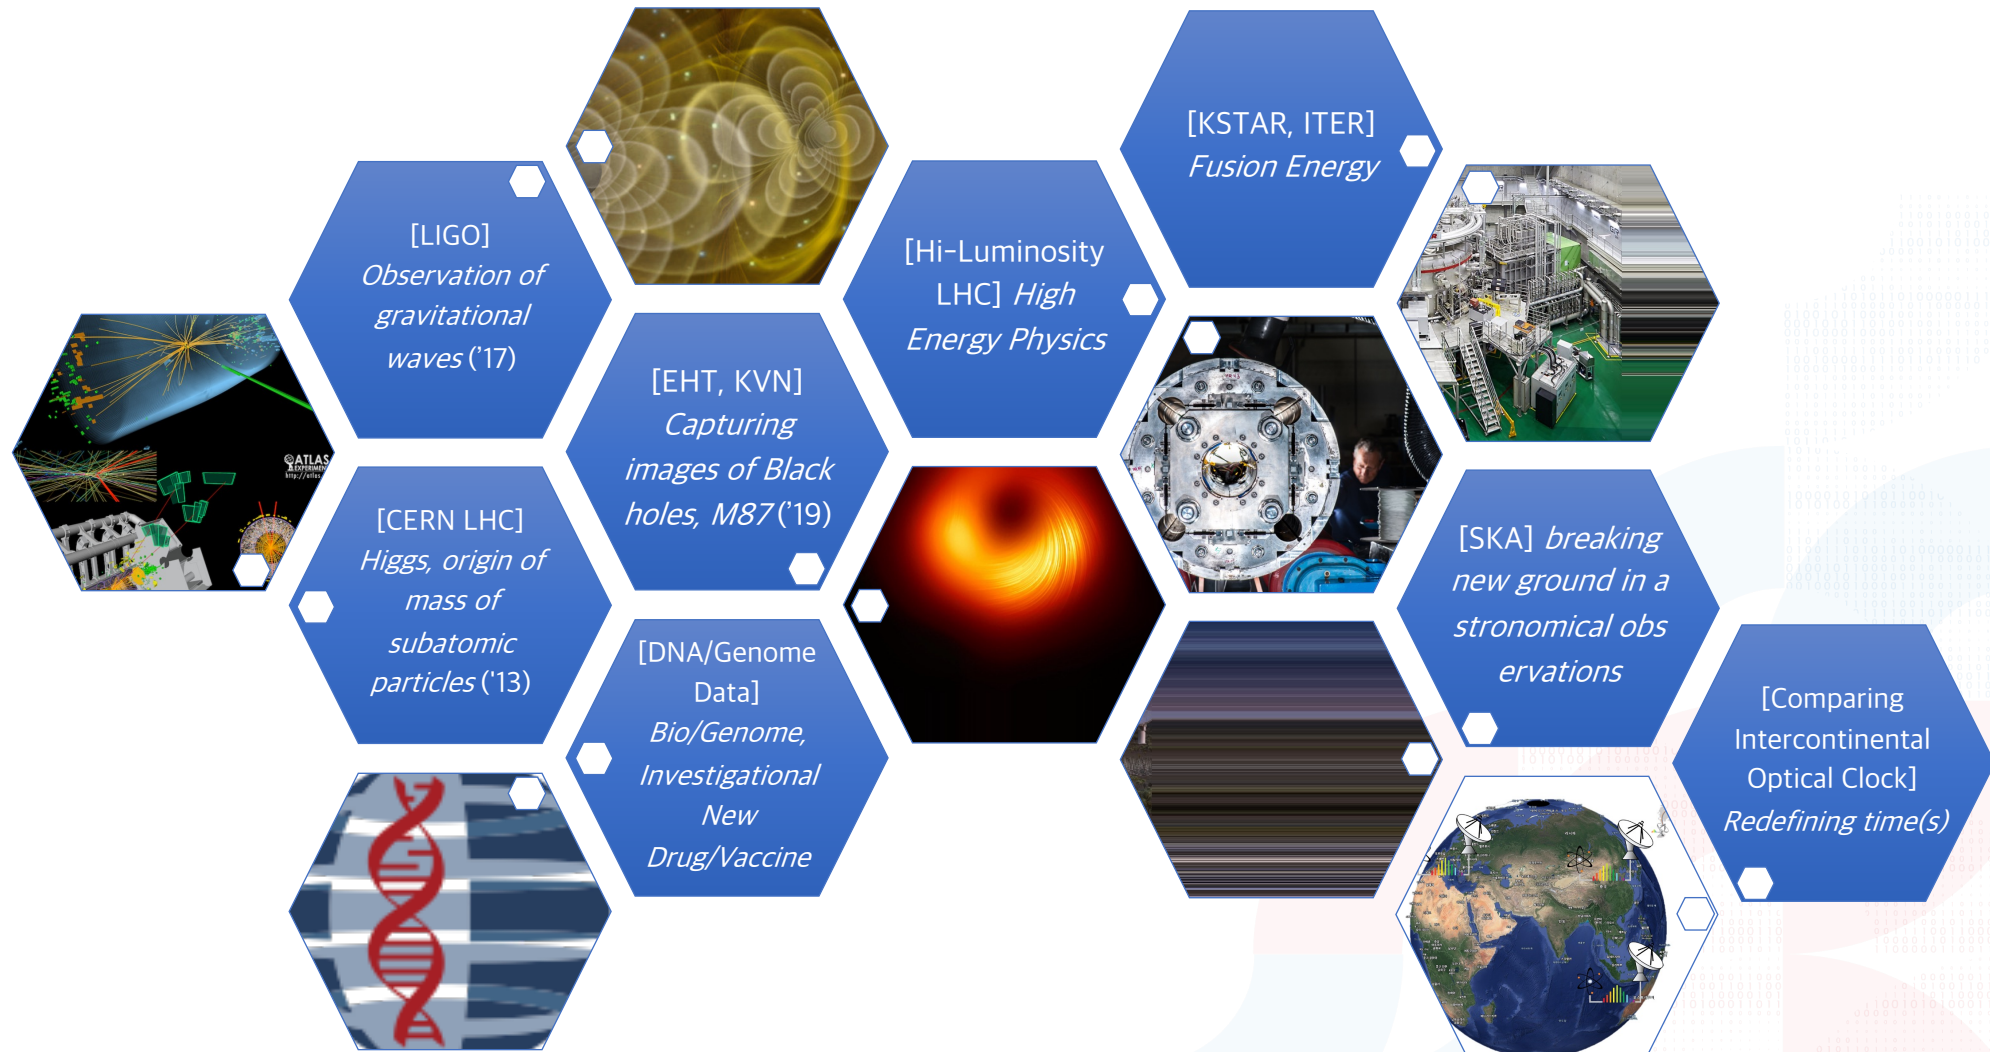

S&T Infra,

Changing the world with Data **KiSTi**

KREONET

- **KREONET/KREONet2, Science and Research Networks in Korea**
- **LHCOPN, LHCONE and HEP Network of KREONET**
- **KREONET Developments and Applications**
- **Summary**

Big science, Data Intensive Science, Interdisciplinary research

KREONET/KREONet2 (AS1237/AS17579)

- KREONET (Korea Research Environment Open Network)
- Korea's National Science & Research Network, managed and operated by KISTI since 1988
- Advanced Research Network in “Utilization and Promotion of National Supercomputing” Act (implemented in 2011 in Korea)
- **First 600Gbps wavelength national-wide optical backbone in Asia**
- **100Gbps/400Gbps national-wide backbone with 18 Domestic Regional GigaPoPs and 6 International GigaPoPs**
- About 200 connected R&E organizations : National Research Institute and Lab, University, University Hospital, Research Institute of Company, library, Public Sector etc.
- 365*24 NOC (Network Operation Center) Service
- Directly linking domestic internet exchanges (KT, LG-U+, Sejoing Telecom) and international internet exchanges (GIX/Seoul, Cogent/Seattle, AMS-IX/Amsterdam, HK-IX)
- Directly connected to network of public clouds (Google, Amazon, Microsoft)
- **L1 Lightpath, L2 VPN, L3 R&E IP service, Science DMZ**
- **ID Federation, Korea Access Federation (KAFE), a member of eduGAIN**

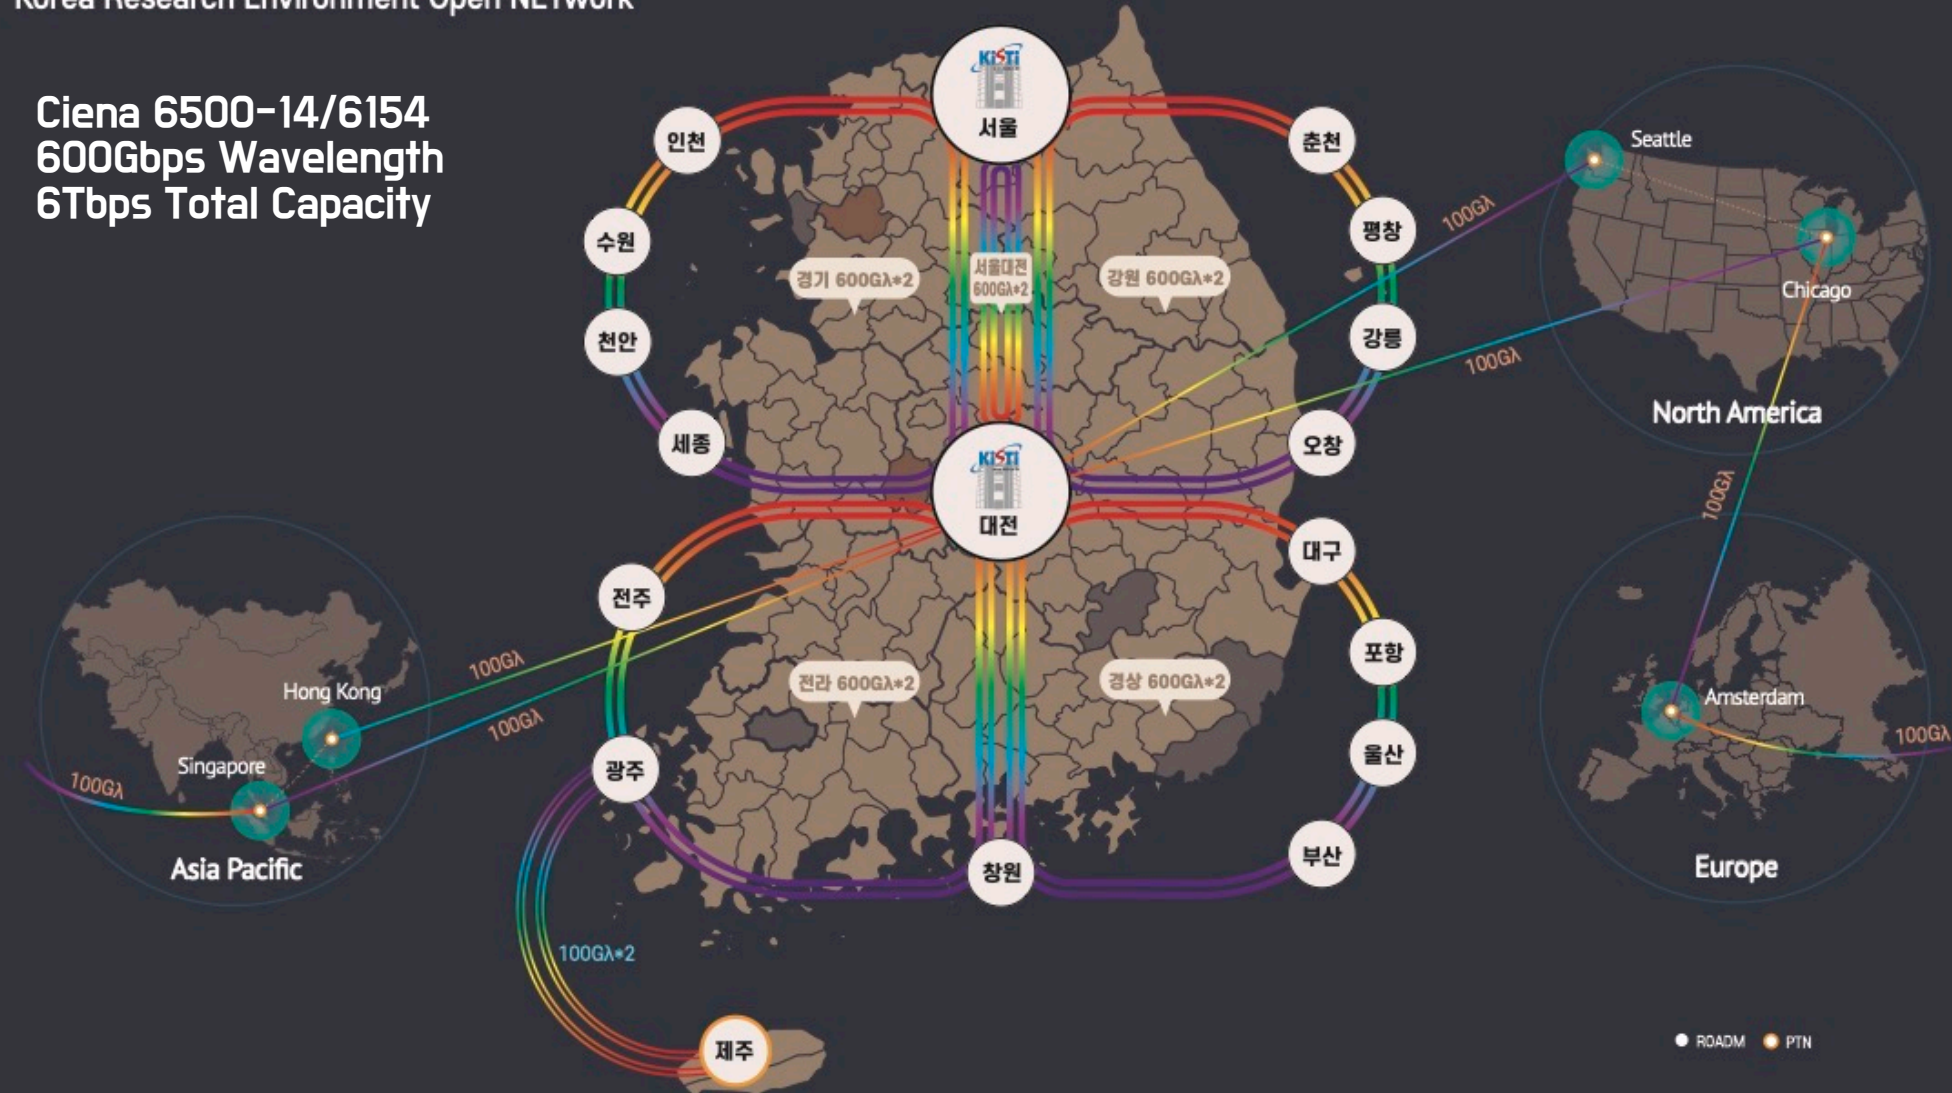

NDeX (National Data eXchange)

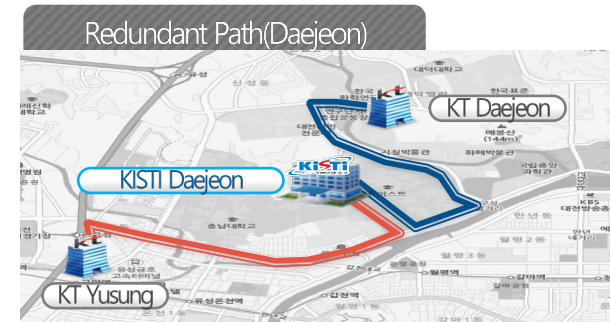

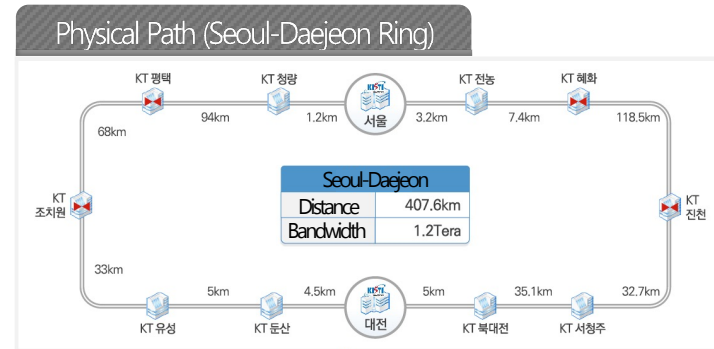

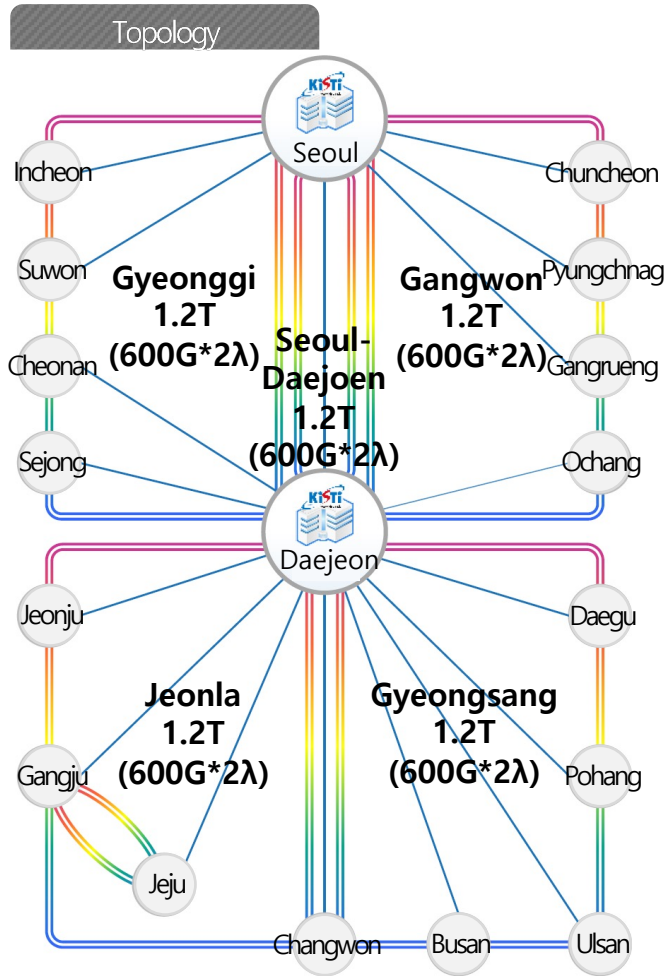

KREONET Optical Backbone 2023

Korea Research Environment Open NETwork

SCinet Spirit of Innovation Award Recognizes 17 Contributors' Role in Supporting International Science Activities for SC22

“The winners of the 2022 SCinet Spirit of Innovation Award have **embraced the spirit of collaboration and cooperation** that showcases the best there is to offer in demonstrating, implementing, and operating leading-edge solutions to challenging problems,” said Matt Zekauskas, SCinet Chair. “This collaboration is truly special to SCinet, and we are all encouraged by and appreciative of their efforts to showcase partnership and innovation.”

...

AARNet, APONET, ARENA-PAC, CENIC, Ciena, Cisco, HARNET, Internet2, KISTI, NICT, NII, Pacific Northwest Gigapop, REANNZ, SingAREN, TransPAC, University of Hawaii, and Verizon were recognized at a private ceremony on Monday, November 14.

National Data eXchange (NDeX) Initiative, Korea

The first NREN Open eXchange in Korea, co-located with cloud datacenter (KT/KT Cloud) nearby the largest submarine cable landing station (CLS) in Busan city

4 Key Technologies of Data exchange

1. High Performance (non-blocking) Optical/Packet Switching Fabric	2. Software Data eXchange (SDX)
3. Trust-based access and control mechanism for Data exchange	4. High-precision Operation and Management of Data exchange

Public/Private Cloud Network

National Supercomputing Network

Commercial Internet Exchange

Data Dam Network

Global Science Network (Hub)

KREONET

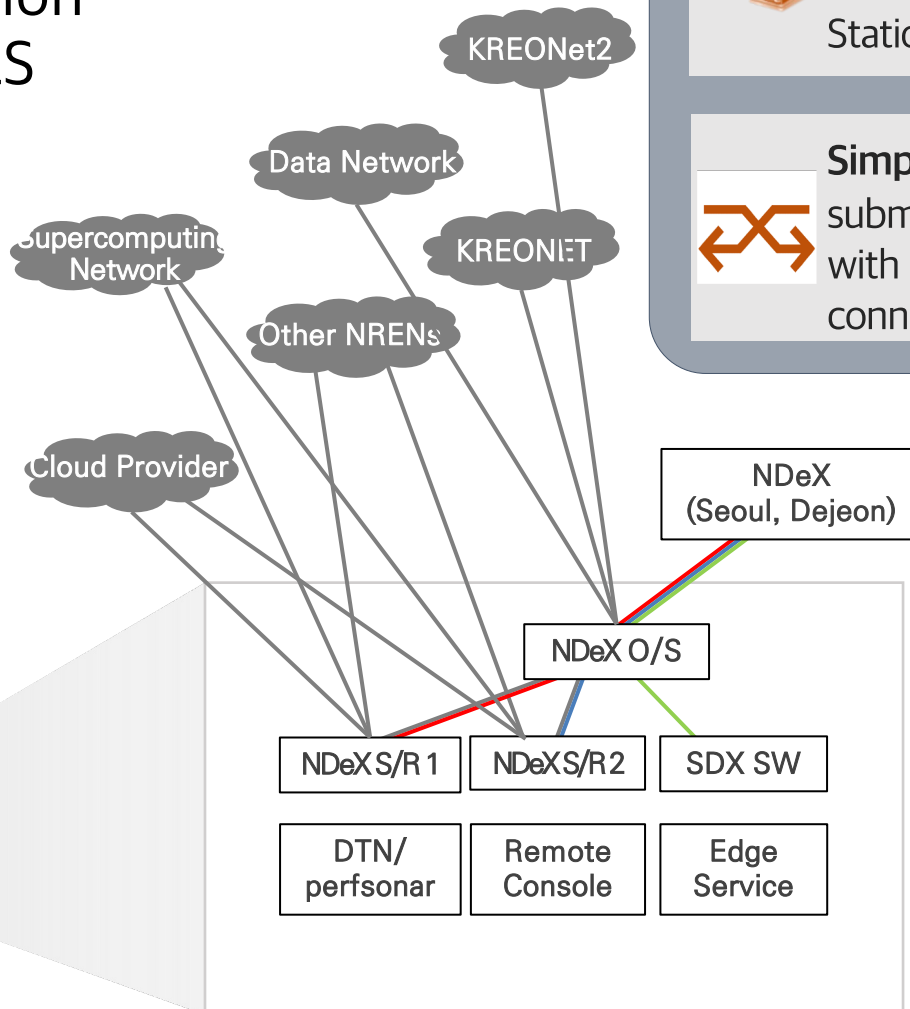

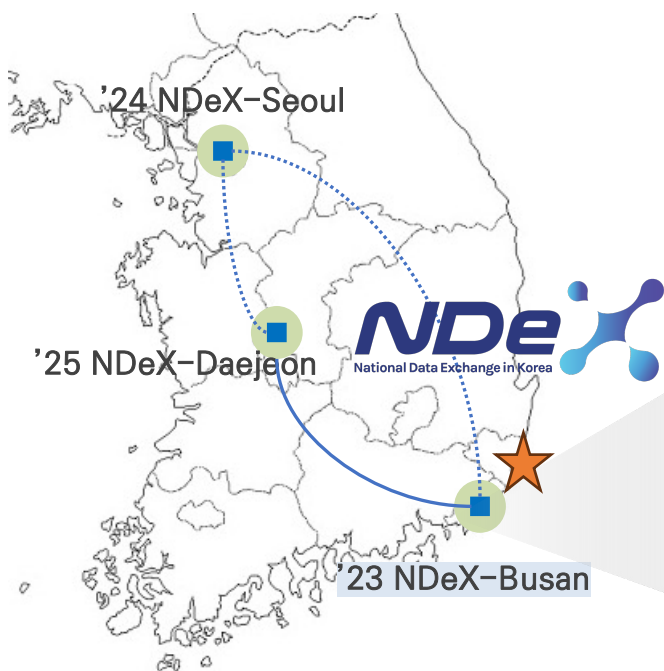

- Opened in July, 2023
- Free backhaul connection between NDeX and CLS

 **The first Open Exchange** located in Busan Cable Landing Station ever

 **Enough capacity** of Submarine cables from East and West

 **Simply connect** on submarine cables with cross-connections

 **Operated by Experts** Group of Submarine Cable NOC (KT/KT Cloud) and KISTI

LHCOPN, LHCONE and HEP Network of KREONET

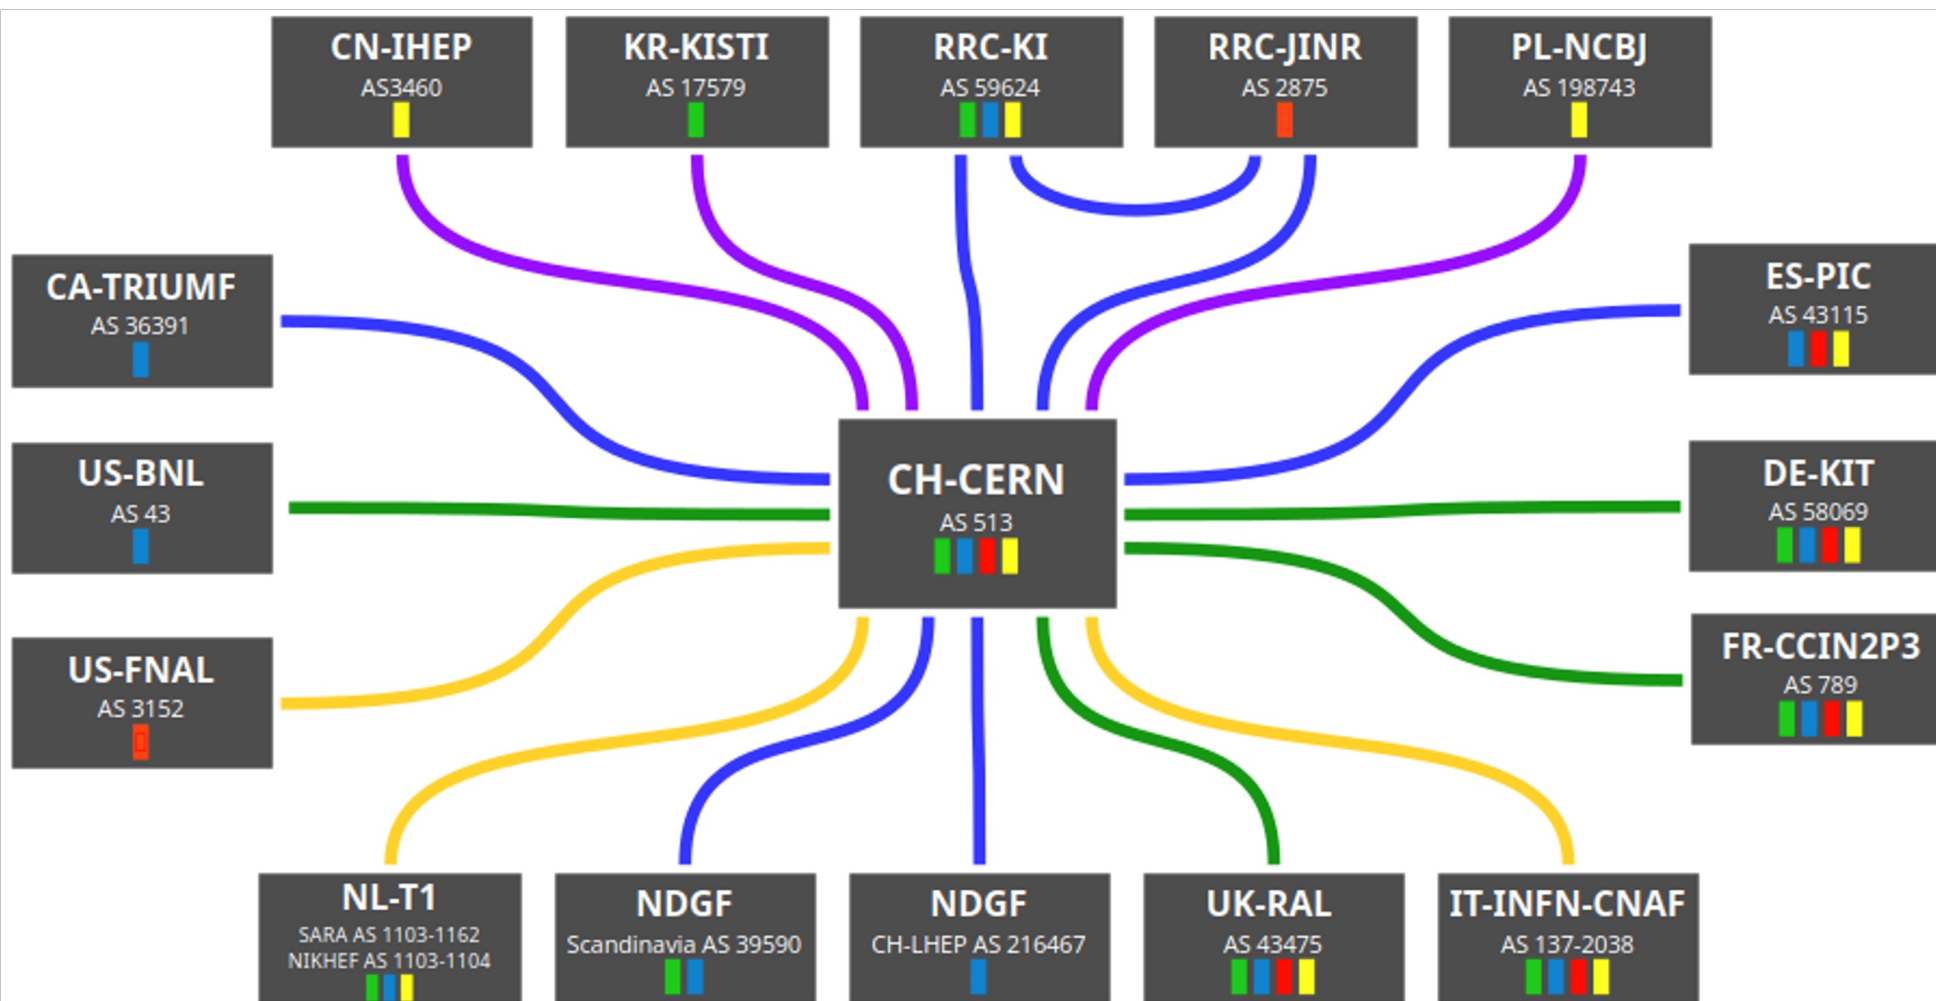

S&T Infra,

Changing the world with Data **KiSTi**

KREONET

LHCOPN

Line speeds:

- 20Gbps (Purple)
- 100Gbps (Blue)
- 200Gbps (Green)
- 400Gbps (Yellow)
- 800Gbps (Red)

Experiments:

- Alice (Green)
- Atlas (Blue)
- CMS (Red)
- LHCb (Yellow)

LHCONE L3VPN: A global infrastructure for High Energy Physics data analysis (LHC, Belle II, Pierre Auger Observatory, NOVA, XENON, JUNO, DUNE)

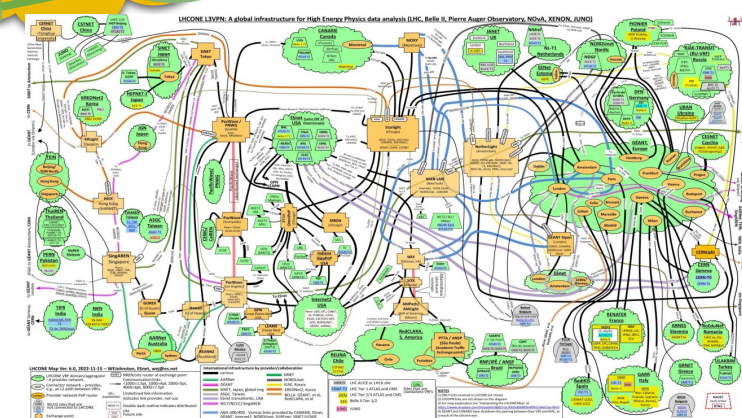

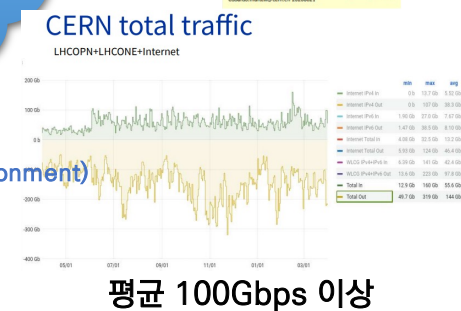

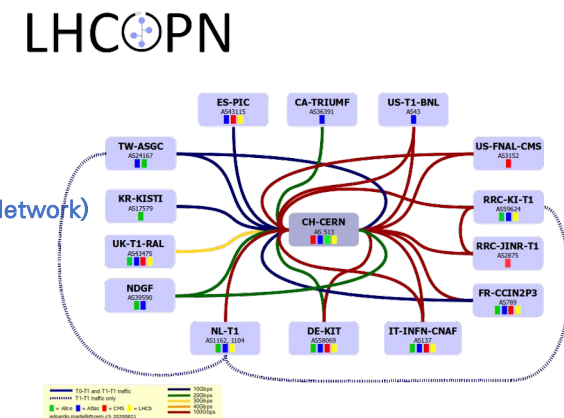

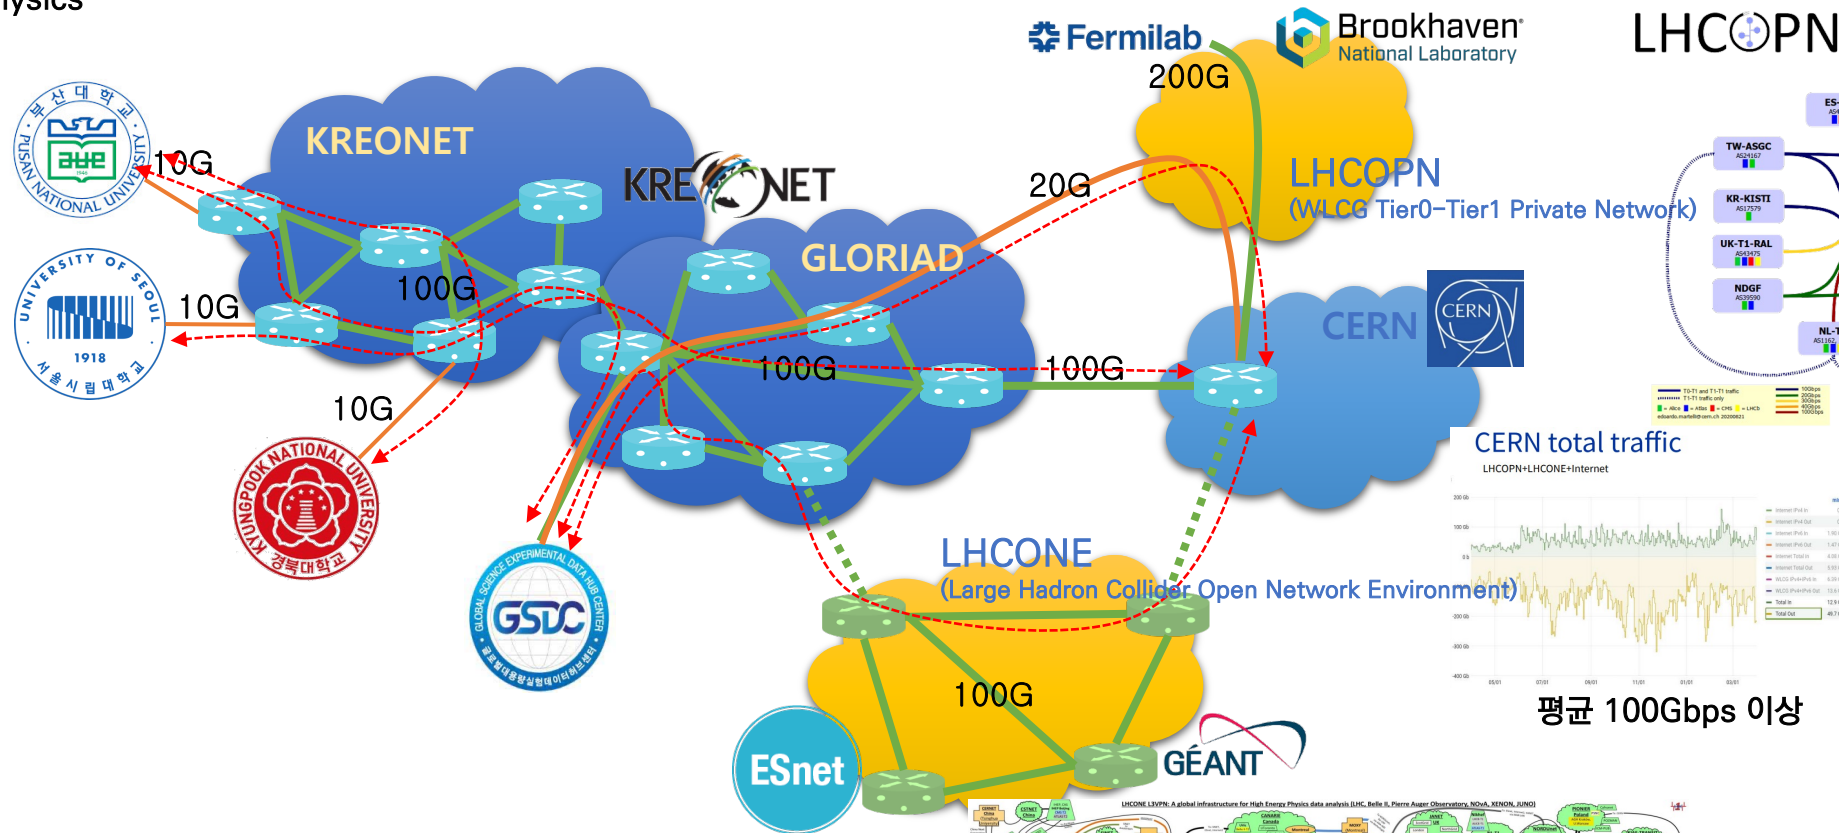

LHCONE Map Ver. 9.0, 2024-04-03 – WEJohnston, ESnet, wej@es.net

- GARR
- LHCONE VRF domain/aggregator - A provider network
- ANSP
- Connector network or institution - provides, e.g., an L2 path between VRFs.
- London
- Provider network PoP router
- WLCG sites that are not connected to LHCONE
- Exchange point
- SINET
- Communication links: $100G=1.5pt, 100G=4pt, 200G=5pt, 400G=6pt, 800G=7.5pt$
- Underlined link information indicates link provider, not use
br>
- Double dash outline indicates distributed site
- Future site

- ### International infrastructure by provider/collaboration
- various
 - AARNet
 - GEANT
 - SINET, Japan, global ring
 - NA-REX
 - ESnet transatlantic, USA
 - SINET/JGN/ SingAREN
 - NREN/SITE router at exchange point
 - NORDUnet
 - KIAE, Russia
 - KREONet2, Korea
 - BELLA: GEANT, et al
 - RedCLARA, et al
 - UNL
 - Sites that are standalone VRFs
 - LHC-T1
 - CNAF-T1
 - Uchi
 - KEK
 - JUNO
 - LHC ALICE or LHCb site
 - LHC Tier 1 ATLAS and CMS
 - Belle II Tier 2/3 ATLAS and CMS
 - Belle II Tier 1/2

- ### NOTES
- ONLY links involved in LHCONE are shown
 - LHCOPN links are not shown on this diagram
 - For map explanation see "Interpreting the LHCONE Map" at <https://www.dicopbx.com/sh/padof580/1raz/AAAB5885H9fHClA4eCtesZdl=0>
 - GEANT and CANARIE have shutdown the peering between their VRF and KIAE, as a result of the Ukraine war.

S&T Infra,

Changing the world with Data **KiSTi**

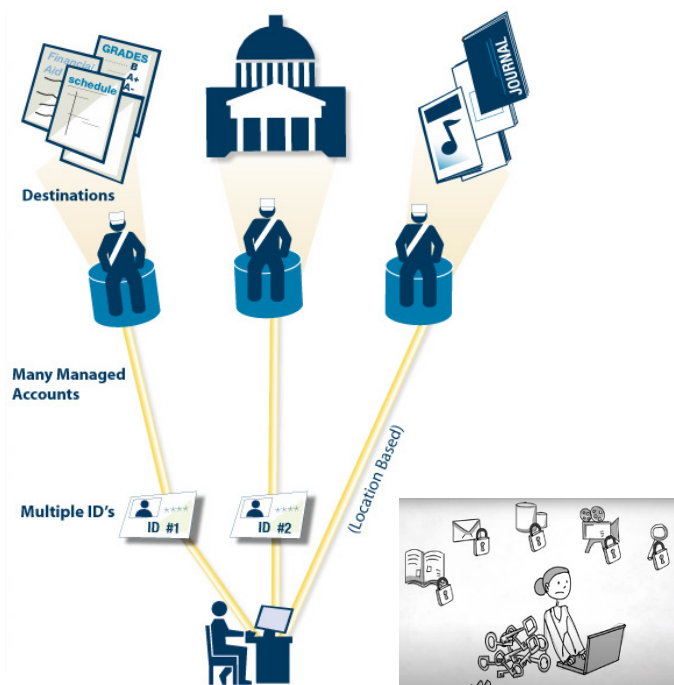

KREONET

Federated access to **create a more trustworthy R&E environment** for seamless collaboration

Korean Access Federation, <https://www.kafe.or.kr>

Korea ID federation to manage trusted ID networking infrastructure of academic, research and industry in Korea

Legacy Access

Non-standard individual ID login for individual external services

Access based-on ID Federation

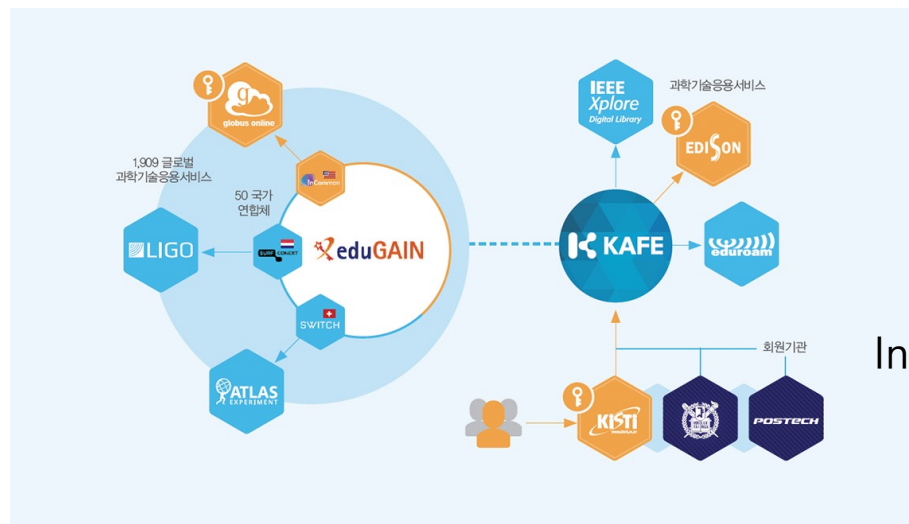

Standard-based integrated login, single sign-on

78 Domestic members
(SNU, KAIST, etc)

KAFE Members

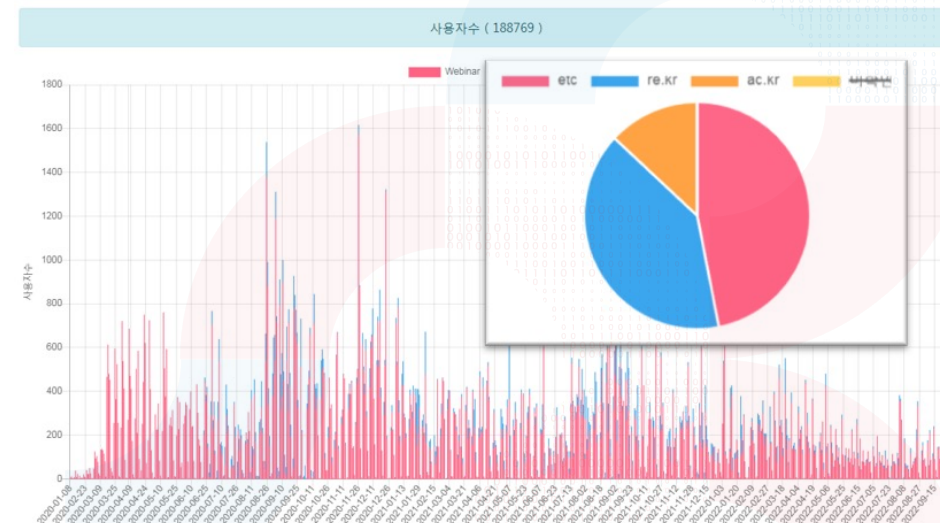

2,510

Inter-federated members
(CERN, CILogon, etc)

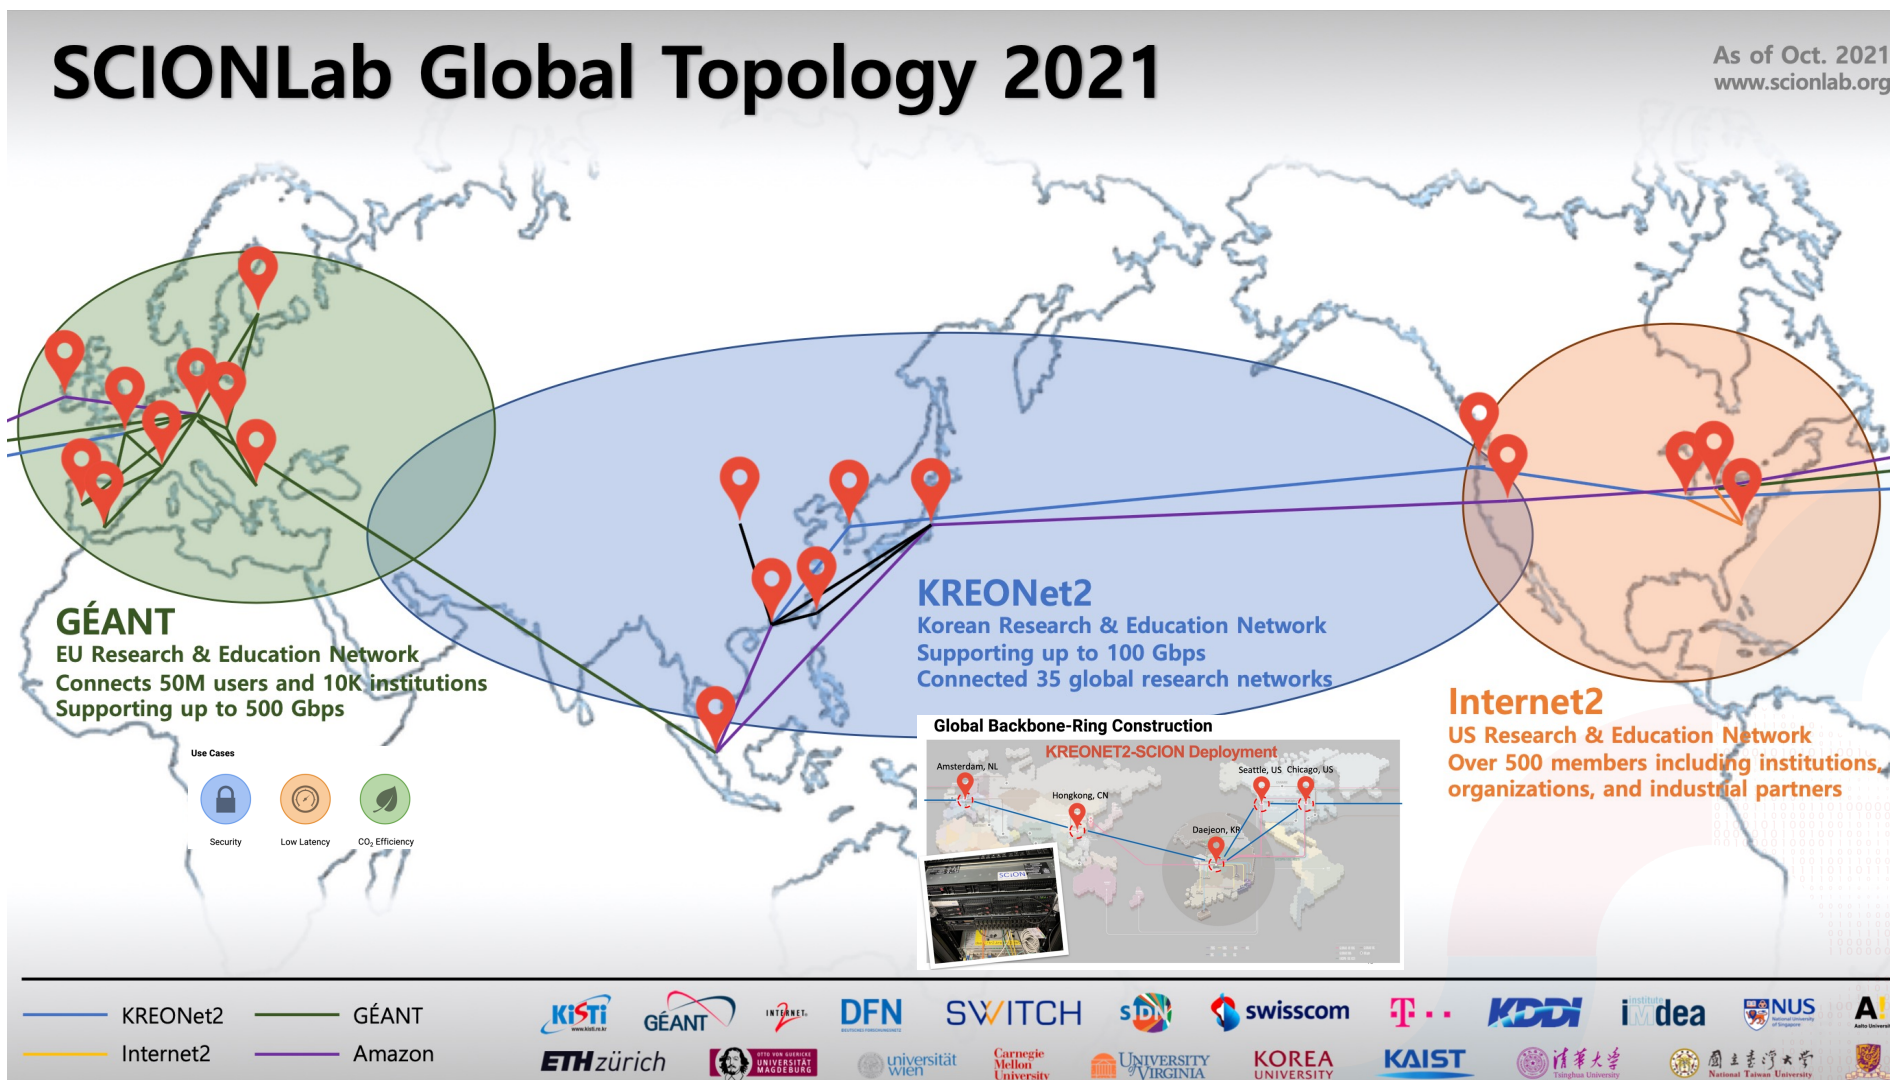

KAFE Federated Services

- KREONET Webinar, Globus, Portal
- KISTI SuperCom Cloud Service (KiCloud KAIROS)
- KISTI AI platform (AIDA), DataOn, ScienceOn
- IEEEExplore, etc (E-journal)
- CERN, LIGO, OpenAIRE, ...

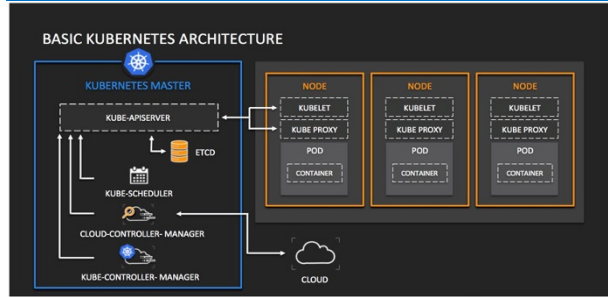

of KREONET Webinar users

Secure, path-aware, multipath networking

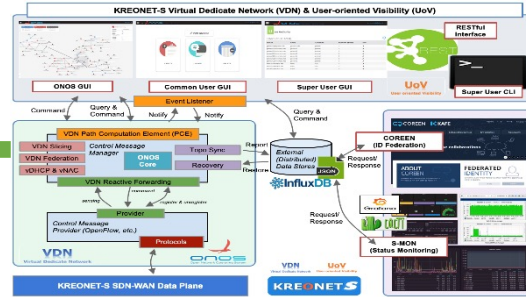

Kubernetes: Storage & Computing Resources

Distributed User Sites
Edge Networks

Physical & Virtual Service
Resource Provisioning on demand

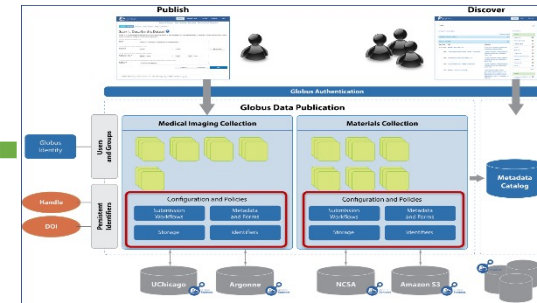

Virtual Dedicated Network: Networking Resources

Wide-area SDN Infrastructure

E2E High Performance Virtual Network Embedding

Globus Online: Research Data Management

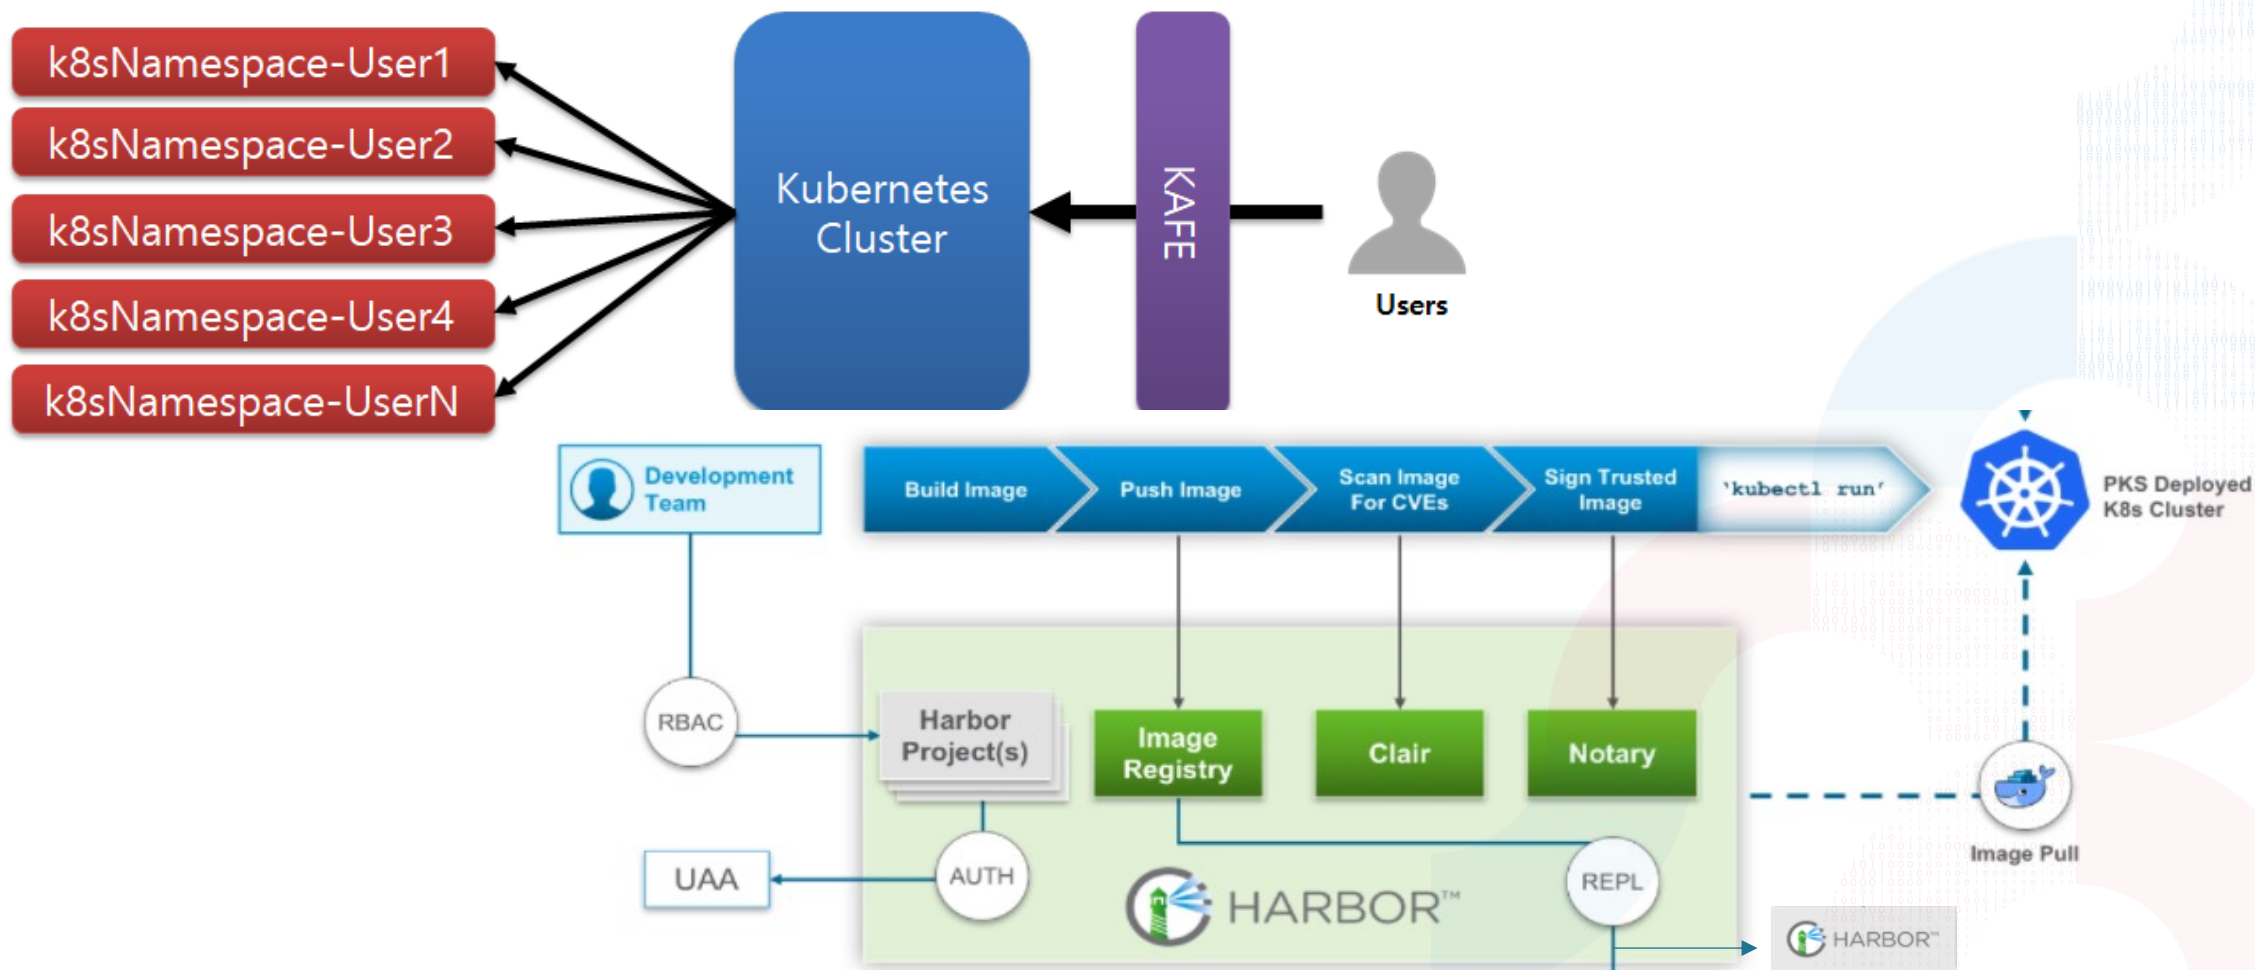

Big Data Transfer,
Sharing, Publication,
and Discovery
via Software-as-a-Service

KREONET N-S-C Orchestrator

1) k8s oriented Storage & Computing Resource Management Module

- Container-based Computing and Storage Resource Management System using Kubernetes Cluster and Ceph Storage
- Easy and Integrated Log-in Facility based on KAFE (Korea Access Federation) - ID Federation Capability
- Private Image Repository Configurations using Open-source Software (e.g., Harbor)

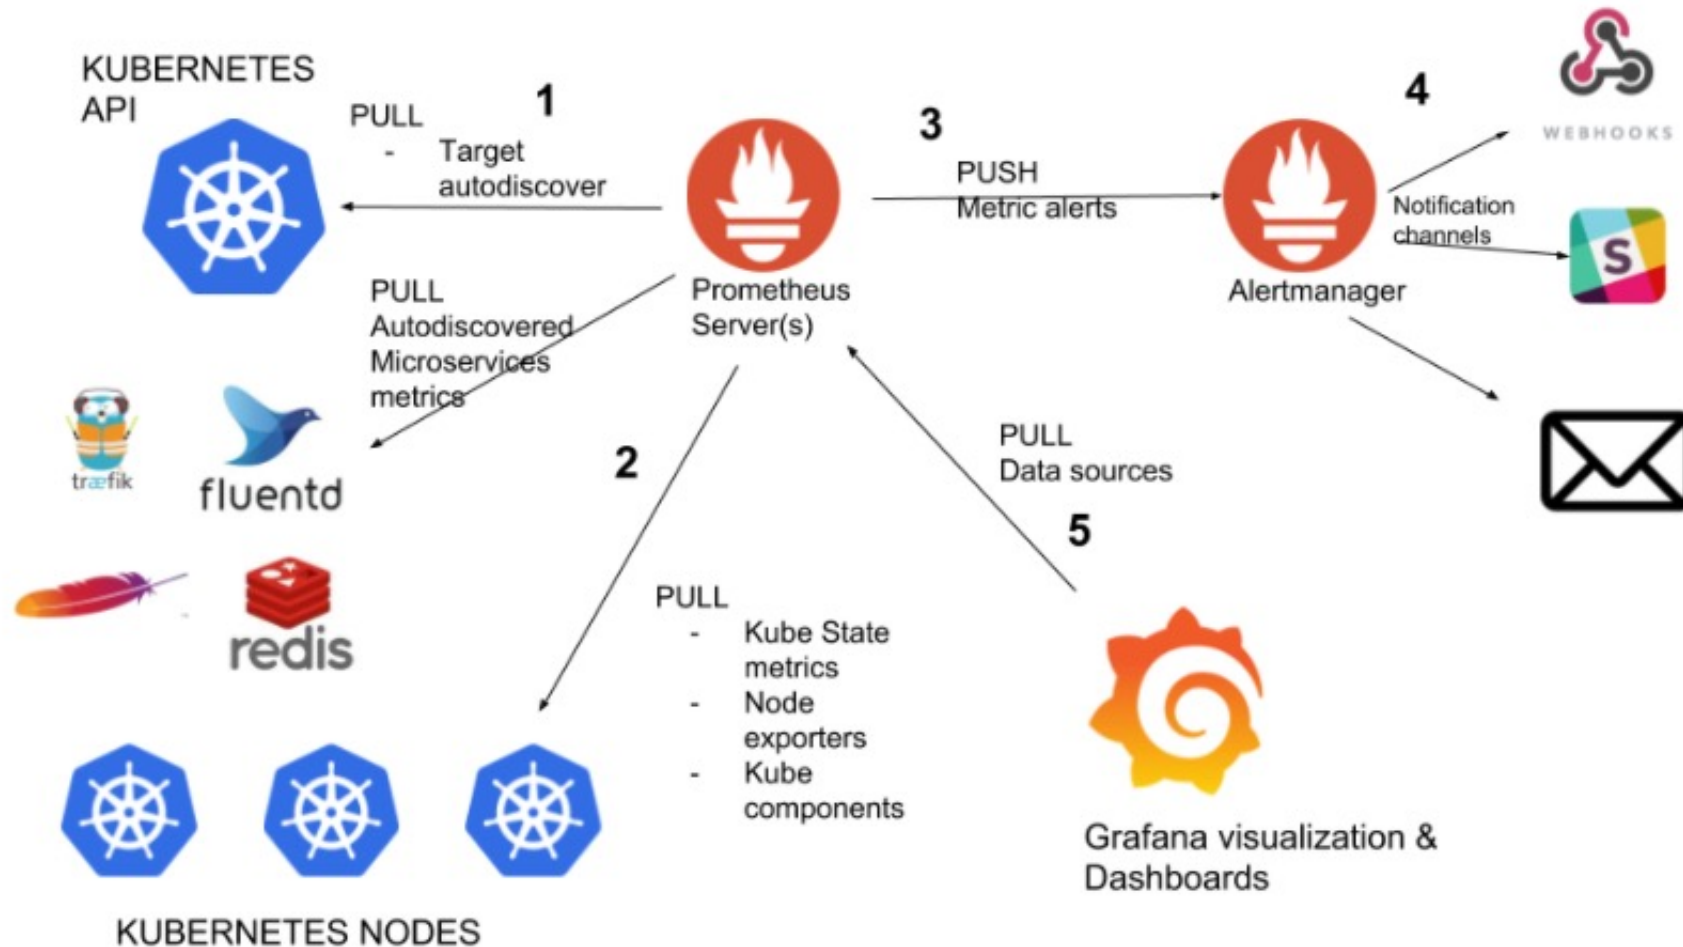

2) VDN Management Module for Network Slicing w/ Computing and Storage Resources

- Virtual Dedicated Network Management System which interacts with Computing and Storage Resources
- Container (k8s) Auto-Selection and Provisioning based on VDN-CNI and Location-oriented Algorithms
- VDN Create, Update, and Delete Operations for Administrators

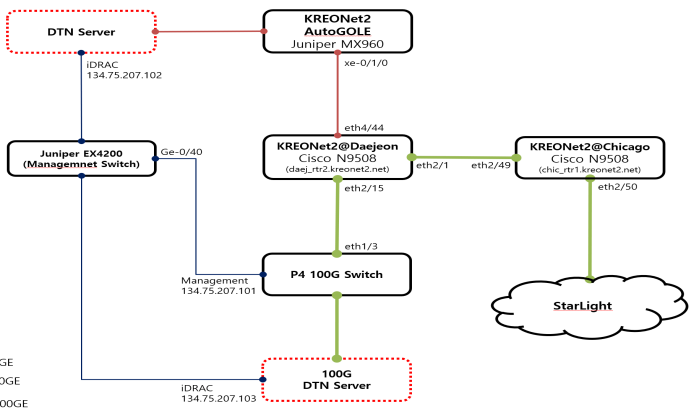

3) Monitoring & Visualization Module

- Individual Resource (Compute, Memory, Disk, etc.) Monitoring System coupled with k8s using Prometheus and Grafana
- System Log (Warnings and Errors) Collection System using Fluentd and ELK (Elasticsearch, Logstash, Kibana), etc.

Objectives:

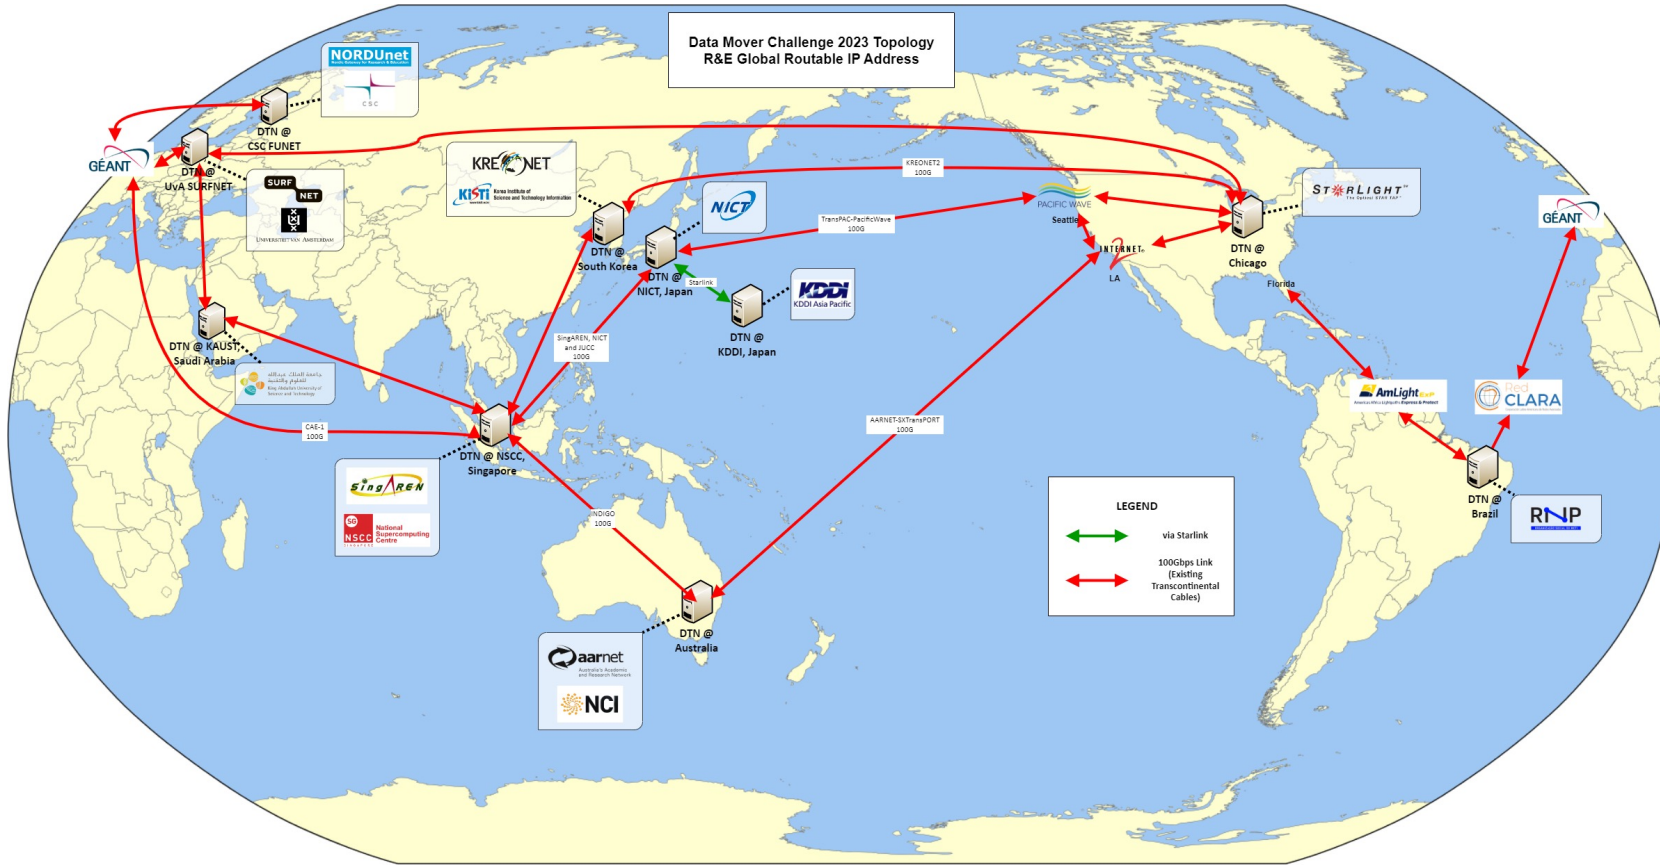

- Integrate the KISTI P4 switch into the global RARE network
- Provide a P4 routing platform and a global testbed for experimentation and testing of solutions to address issues in the R&E landscape
- Improve visibility of control plane metrics by allowing quick creation of instances from the NMaaS platform

Objectives:

- A competition that is run once every 2 years and it aims to **bring together experts from industry and academia in a bid to test their software and solutions for transferring huge amounts of research data.**
- Optimising point-to-point data transfers between sites
- Showcase challengers by having them compete in deploying the **best software tools on Data Transfer Nodes (DTNs)** that are set up within current international Research and Education Networks across the globe.
- To bring together a community of experts in DTN deployments and operations

<Network Partners>

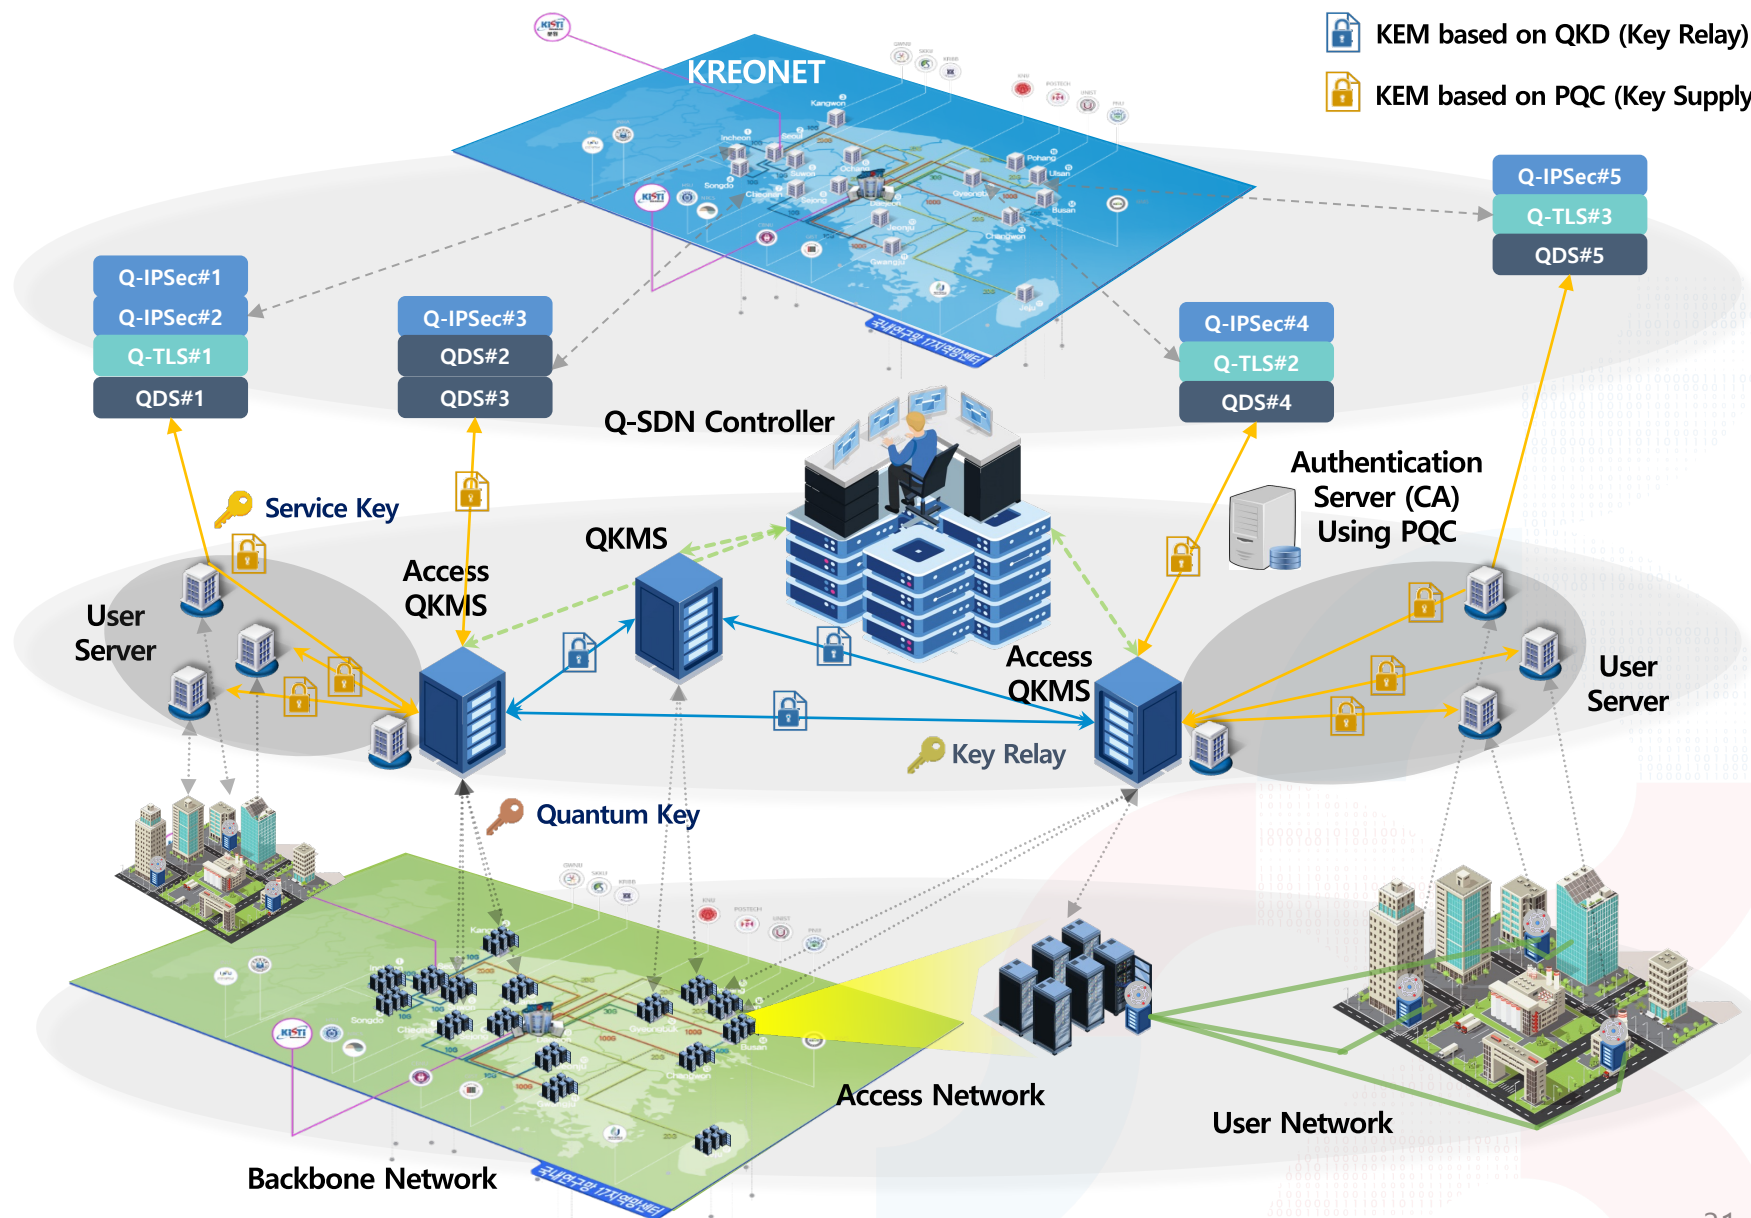

<DTN Partners>

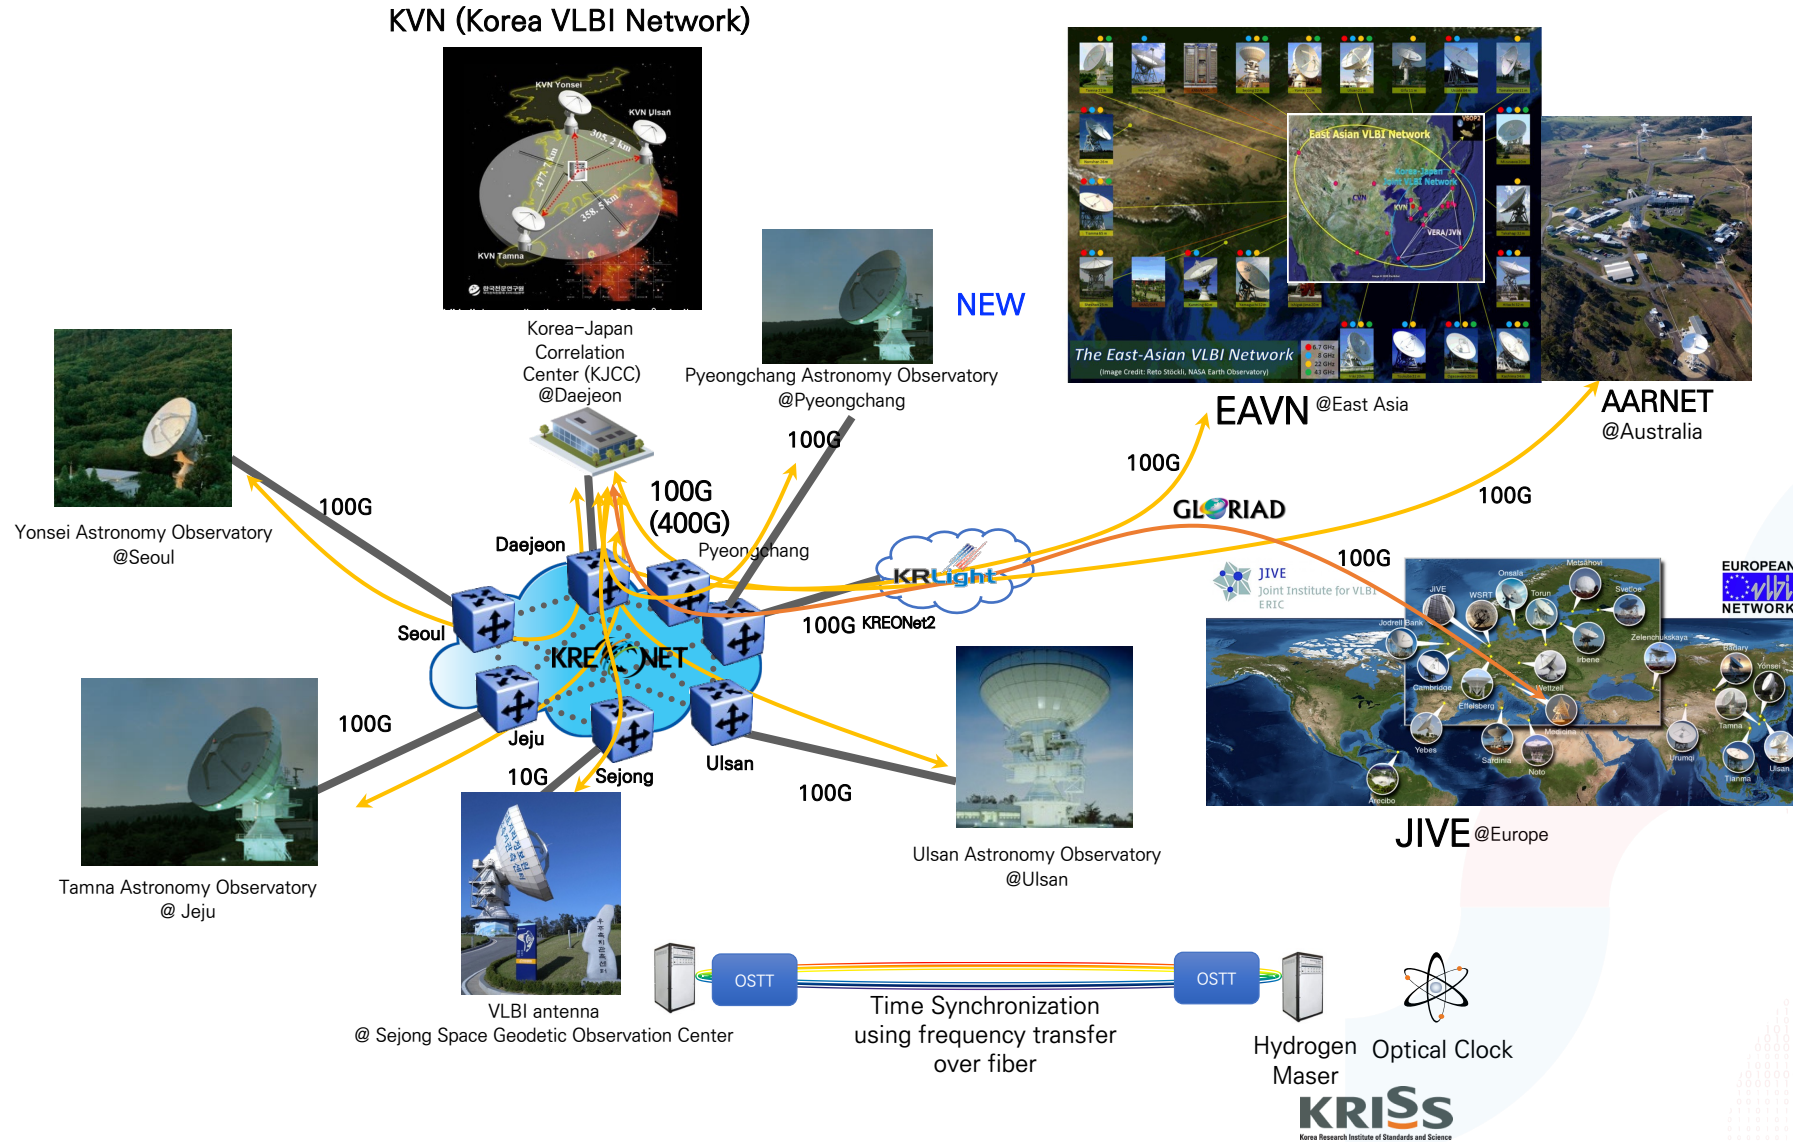

QKD system for KREONET

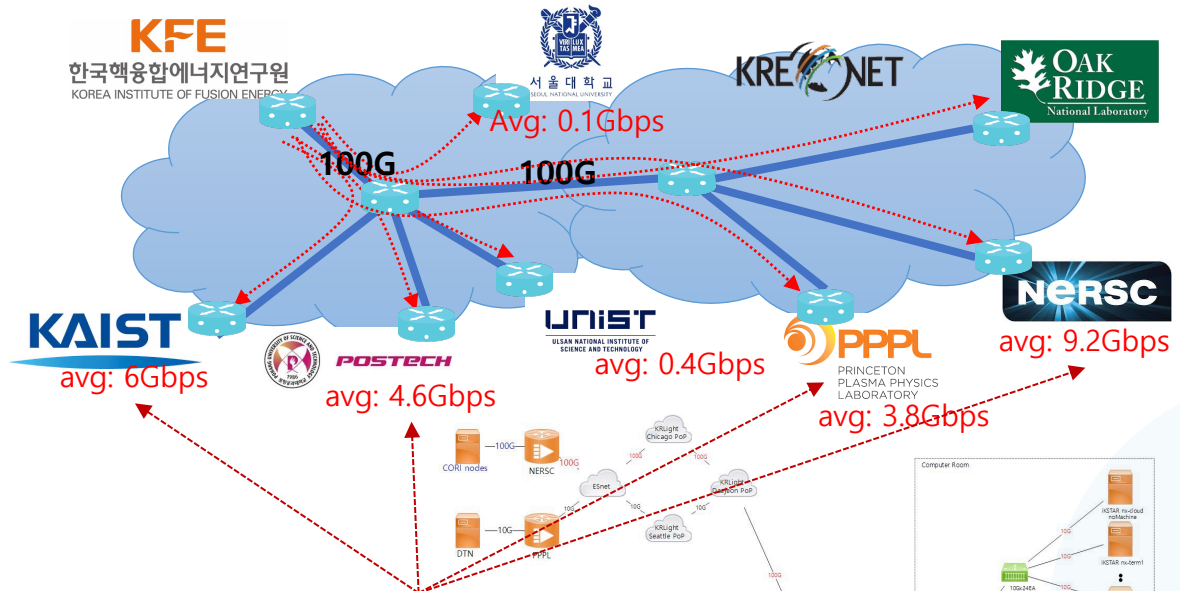

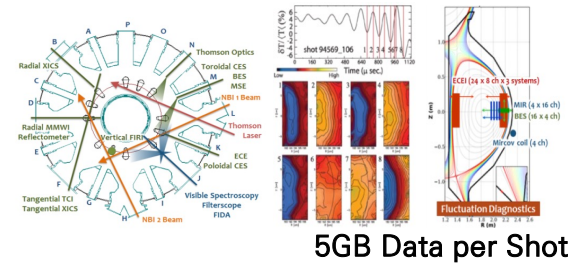

- Enhancing the security of KREONET through preemptive action against quantum computers
- QKD system for backbone network
 - Long-distance QKD system development
- QKD system for access network
 - Multiplexable QKD system with reasonably sized receiving end
- Networkization of QKD system
 - Reduction of cost, complexity, and operational difficulty of QKD system

KREONET, the national science and research network of Korea

- **world-class national science and research network backbone**
- Collaborate with global research network for enhancing reliability of global network and demonstrating new network technology and service
- Develop advanced network and application service that meets user requirements of the big Science

LHCOPN & LHCONE

- LHCOPN, dedicate network to transport of WLCG traffic between the Tier 0 and the Tier 1
 - **Upgraded to 100G/400G and more**
- LHCONE, L3VPN, private network to provide a collection of access locations, LHC T1/2/3 sites
 - **Scientific Network Tags (Scitags)** is an initiative promoting identification of the science domains and their high-level activities at the network level
 - **"multiONE"** with BGP communities, Each site joins only the VPNs of the groups it is collaborating with (e.g. ATLAS-ONE, CMS-ONE, DUNE-ONE, BelleII-ONE...)
 - **KREONET LHCONE allows transit, if requested**

S&T Infra,
Changing the world with Data **KiSTi**
