multi body final states production in electron-positron annihilation and their contributions to $(g-2)_\mu$

Saturday 20 April 2024 11:40 (25 minutes)

正负电子湮灭到多体轻强子末态过程及其对 $g-2$ 的贡献: 我们用手征有效场论研究了正负电子湮灭到 $KK\pi$, 4π 等过程, 抽出了形状因子, 计算了截面, 并以此为基础估计了它们对缪子反常磁矩的贡献。我们的结果与传统的数据驱动方法较为接近。
