

CAS course on "Introduction to Accelerator Physics", 22 September - 05
October 2024, Santa Susanna, Spain

Contribution ID: **210**

Type: **not specified**

Putting it all together

Friday 4 October 2024 14:50 (1 hour)

At the end of the course a so called "minimum take-away" will be compiled from all previous courses.

This will help students to identify the essential messages, which make the foundation of all accelerator physics and technologies, from all other information, which can be considered as "general accelerator culture".

The journey will start with a summary of the most used mathematical concepts and end with the most important accelerator technologies.

Presenter: SCHMICKLER, Hermann
