2024-11-20

EP R&D Report (Reminder)

- It's annual report time again
- We have prepared the template for our WP, to be eventually merged into the main document
  - https://www.overleaf.com/5191481688kqnfsccpdrxf#dbb142
- It should be shorter than last year's report
  - So a maximum of two pages per task (remember, we have more tasks this year)
  - Excluding references and figures (don't crush figures to meet a page count)
  - Please follow the same reference categories as least year (`wp7-preamble.tex`)
- So we should concentrate on the most important high-level achievements
- First draft by 6 December please, so that we can review internally
  - Needs to be with the SB by 10 January

EP R&D Seminars

- Peter will give an ML Sim presentation on December 2
  - https://indico.cern.ch/event/1469760/
  - We should plan more talks for next year
    - Please let André and Graeme know and we will coordinate with Florian
  - Presentations are 25' and need to be understood by the intelligent non-expert!

Today and Future Meetings

- Today we hear about the Heterogeneous Frameworks from Mateusz
- Next time: 11 December
  - Core Libraries kick off and Reconstruction Tracking plans
- Soon we will start to plan the group meetings for 2025!
