

6th DITANET Topical Workshop on Particle Detection Techniques: 7th – 8th of November 2011

Venue:

Centro Nacional de Aceleradores – CNA
Calle Tomás Alba Edison, 7
Parque Tecnológico Cartuja '93
41092 Seville – Spain

The CNA: Centro Nacional de Aceleradores – National Accelerators Center

The workshop will be held at the CNA – Centro Nacional de Aceleradores. The Centro Nacional de Aceleradores, CNA, was founded in 1997 by a joint collaboration between the University of Seville, the Government of Andalusia and the CSIC (the Spanish National Research Council). It is a Singular Scientific and Technological Installation, ICTS, dedicated to interdisciplinary research with ions accelerators.

There are 3 accelerators available at the CNA:

- A 3 MV Tandem van de Graaff accelerator
- A Cyclotron that provides protons of 18 MeV and deuterons of 9 MeV
- A Tandem Cockcroft-Walton accelerator, so called 1 MV Tandetron, used for mass spectrometry.

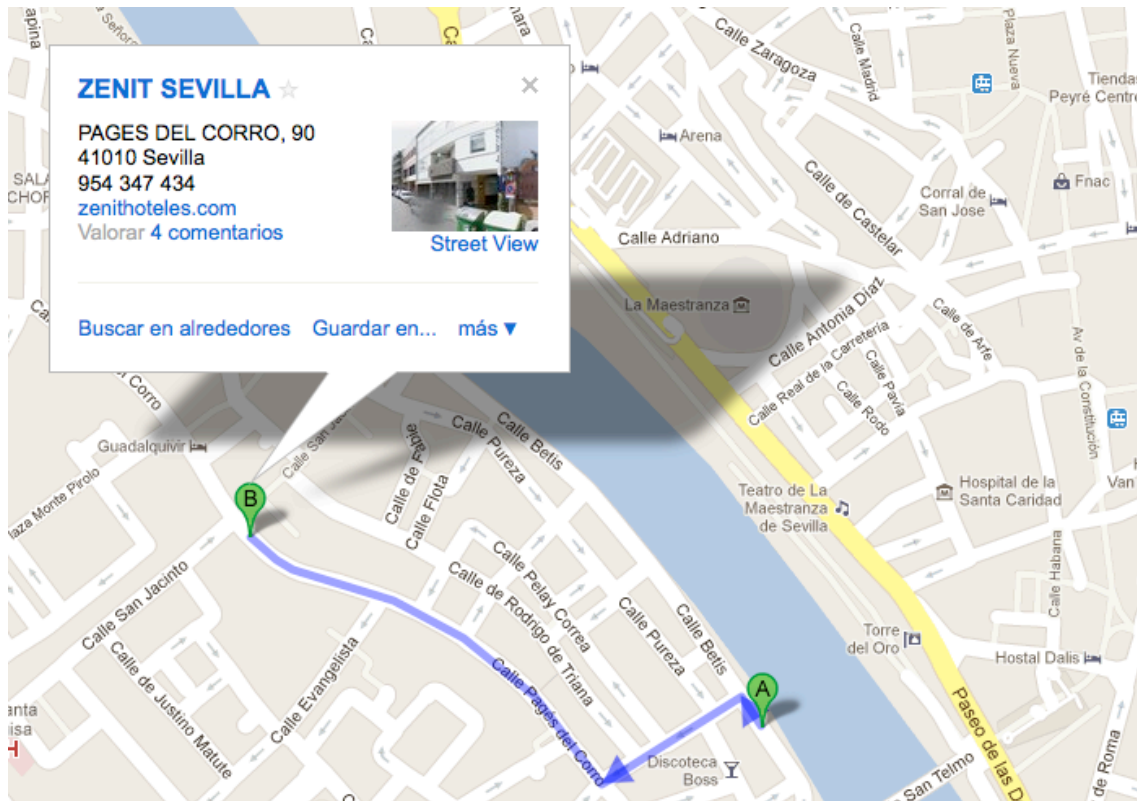

The applications of the accelerators available at the CNA, amongst others, cover fields such as material sciences, environmental sciences, nuclear and particle physics, instrumentation, medical images treatment as well as biomedical research.

The CNA, is located at
Calle Tomás Alba Edison, 7
Parque Tecnológico Cartuja '93
41092 Seville – Spain

Social Events

- A “informal” dinner for all the participants of the workshop will be held on Monday, November 7th at 9 pm, at the restaurant **Abades Triana Betis Street 69, 41010 Sevilla.**

- Lunches during the workshop will take place at the *Confederación de Empresarios de Andalucía – CEA* that is located right next the Workshop Venue.

General Information about Seville

Seville is the artistic, cultural, and financial capital of southern Spain. It is the capital of the autonomous community of Andalusia and of the province of Seville. It is situated on the plain of the River Guadalquivir, with an average elevation of 7 meters (23 ft) above sea level.

Places to visit

The Cathedral of Seville, The Alcázar, The Torre del Oro, The Town Hall, The Palace of San Telmo, The University of Seville housed in the original site of the first tobacco factory in Europe La Antigua Fábrica de Tabacos, The Plaza de España, The Metropol Parasol located at Plaza de la Encarnación, The Parque de María Luisa, The Alcázar Gardens, The Gardens of Murillo and the Gardens of Catalina de Ribera, The Parque del Alamillo y San Jerónimo and The American Garden

The neighborhood of Triana, placed in the west bank of the Guadalquivir River, played an important role in the history of the city and constitutes by itself a folk, monumental and cultural center.

On the other hand, at the northern side of the city center is found La Macarena neighborhood, with some religious and monumental remarks, such as the Museum and Basilica of La Macarena or the Hospital de las Cinco Llagas.

Gastronomy

Seville is a gastronomic center, with a cuisine based on the products of the surrounding provinces, including seafood from Cádiz and Huelva, olive oil from Jaén, and sherry from Jerez de la Frontera.

The tapas are one of the main attractions of the city: people go from one bar to another, enjoying small dishes called tapas (literally "lids" or "covers" in Spanish, referring to their probable origin as snacks served in small plates used to cover drinks.)

Nightlife

Main nightlife centers are located within and around the city center. La Alfalfa neighborhood houses many pubs and tapas bars. A more alternative atmosphere can be found in La Alameda or Plaza del Salvador. Nice Nightclubs and restaurants are located in Betis street in Triana.
