

# ROOT Fixathon closeout Day 1

*Marta Czurylo, Vincenzo Eduardo Padulano, Danilo Piparo*

# Status update

The screenshot shows two panels from a GitHub repository. The left panel, titled 'PR is open' with 20 items and an estimate of 3, lists several pull requests in review. The right panel, titled 'Done' with 14 items and an estimate of 0, lists issues that have been completed.

**PR is open (20) Estimate: 3**

- root #14593: Build fails with CLING\_DEBUG=1 set
- root #14586: [ROOT-6317] using namespace statement does not provoke autoload
- root #14565: [ROOT-5578] Add (Double\_t minval = -FLT\_MAX) parameter to THStack GetMinimum
- root #14570: [ROOT-10978] Remove R\_LOAD\_LIBRARY from tutorials
- root #14573: [ROOT-10118] Follow Python convention for bool representation of STL containers in PyROOT
- root #14575: [ROOT-10196] boundary check in TH1::AddBinContent is missing
- root #14576
- + Add item

**Done (14) Estimate: 0**

This has been completed

- root #14599: The example th2polyUSA.C needs re-labelling
- root #14564: [ROOT-5138] Provide an implementation of Random123
- root #14568: [ROOT-10943] Multiple variable definition
- root #14574: [ROOT-10465] rootcling ignores -W flag passed through ACLIC
- root #14578: [ROOT-10213] Make RResultPtr<Object> behave more like Object\*
- root #14542: [ROOT-8132] TF1 with specified fill attributes produces binned plot
- root #14549: [ROOT-10813] Markers with "open shape" style cover error bars
- + Add item

- ▶ 20+ PRs open
- ▶ 14+ resolved issues

Thank you for the amazing contributions!!!

# The day in images

- ▶ How was the first day?
- ▶ This is your space for comments and feedback!

- ▶ Dinner is at 19.30 at Luigia's
- ▶ For those who want to walk from Idea2, we leave ~19h

See you tomorrow!
