

# **How are you hacked? Practical examples through the attacker's eyes - or Phishing, impersonation and AI. What will change this year?**

*Tuesday 30 January 2024 16:10 (20 minutes)*

Tuomas Mettänen works as an IT Security Officer at European Molecular Biology Laboratory (EMBL) and handles IT Security Incidents as part of the Cybersecurity Incident Response Team (CSIRT). The presentation looks at the potential data breaches through the eyes of the attacker. We will take a look at the tools and techniques often used by organised criminal groups, especially regarding phishing toolkits and share best practises on how to mitigate the potential data breach.
