

# Requests to run after the end of the protons in 2024:

- Multiple facilities continued running after proton beams were stopped in 2023 (e.g. CLEAR, ISOLDE winter physics, ELENA with H<sup>-</sup> beams, Linac4 MD, Linac3/LEIR/PS...)
- If you have similar requests for the end of 2024, please send an email to FOM support with the details.
- Action on physics and MDs coordinators, responsible for the different accelerators....: Submit a request if would like to run after the end of the protons in 2024

# Requests to run during LS3:

- The IEFC has asked the FOM to compile all requests to run during LS3. Discussed during the 07.11.2023 and 14.11.2023 FOM meetings.
- Template: <https://indico.cern.ch/event/1340096/contributions/5641536/attachments/2751697/4789933/RequestToRunLS3.pptx>
- Please send an email to FOM support with the form as an attachment.
- **Requests received as of 06.02.2024:**
  - Linac3 and LEIR by Richard Scrivens
  - Linac4 Source Test Stand / 3 MeV Test Stand in bld.152 by Edgar Sargsyan
  - CLEAR by Pierre Korysko
  - MEDICIS by Charlotte Duchemin
  - ISOLDE offline 1 and offline 2 separators by Sebastian Rothe
  - AWAKE by Edda Gschwendtner
  - ELENA with H<sup>-</sup> beams by Davide Gamba (to be formalized)
  - MADMAX by Maarten Van Dijk
  - GIF++ by Martin Jaekel
- We have also received some expressions of concern. IEFC and LS3 committee will need to evaluate if the requests are compatible with the LS3 activities.
- **Action on physics and MDs coordinators, responsible for the different accelerators...:  
Submit a request if would like to run during LS3.**
