

The Poster Prize Winners are:

Milena Albino:

Hybrid stars: Bayesian Approach with NJL

Pavlo Panasiuk:

The effect of late-time heating in hybrid millisecond pulsars

Biplab Mahato:

Graphene motivated generalized 2+1D Gross-Neveu model

The Short Contribution Prize

The winners are:

Noshad Khosravi Largani

Simulations of massive star explosions driven by a first-order QCD phase transition. Neutrino signal and gravitational wave mode analysis

Luigi Scurto

General predictions of neutron star properties using unified relativistic mean-field equations of state

Nikolai Shchechilin

Cooking nuclear pastas in neutron stars

Congratulations !

Many thanks to the organizing team

Oleksii Ivanytskyi

Oleksandr Vitiuk

Elizaveta Zherebtsova

Biplab Mahato

Stefanos Tsiopelas

To the Lecturers for excellent science

... and to all participants for their contributions !!!
