

Session Program

4-8 Nov 2024

New Physics from Galaxy Clustering III

Short Talks 4

Centro Congressi S. Elisabetta, Parma
Parco Area delle Scienze 95

Wednesday 6 November

11:45

Short Talks 4

Session | **Location:** Centro Congressi S. Elisabetta, Parma, Parco Area delle Scienze 95

11:45-11:55

A plot twist in the growth of perturbations: matter clustering suppression induced by Standard Model processes

Speaker

David Camarena

11:55-12:05

Bootstrapping Lagrangian perturbation theory for LSS

Speaker

Kevin Pardede

12:05-12:15

Power spectrum and bispectrum analysis of eBOSS DR16 quasar sample to constrain primordial non-Gaussianity

Speaker

Matilde Barberi Squarotti

12:15-12:25

The renormalization group for Large-Scale Structure

Speaker

Henrique Rubira

12:25
