

## Roadmap for anti-nuclei XS (discussions)

*Thursday 17 October 2024 16:45 (30 minutes)*

- Q1. Most striking physics cases (e.g. DM vs background, incremental vs breakthrough, etc.)?
- Q2. Measurements we already have (e.g. isospin asymmetry, etc.) and energy range/precision/projectiles/targets needed to go forward (ideally a list)?
- Q3. Readiness of facilities/experiments/technology to achieve goals
- Q4. Status of theoretical models/Monte Carlo, can/should we improve them?

**Session Classification:** Brainstorming on a roadmap: preparing a white paper
