Collaborative operational security and Security Operations Centre deployment models

Wednesday 17 April 2024 11:35 (25 minutes)

In previous HEPiX meetings we have presented on the strategic direction of the Security Operations Centre working group, focused on building reference designs for sites to deploy the capability to actively use threat intelligence with fine-grained network monitoring and other tools. This work continues in an environment where the cybersecurity risk faced by research and education, notably from ransomware attacks, remains persistent.

In this report we discuss recent developments in the working group, including a summary of our most recent hackathon, with a particular focus on potential methodologies for different types of facilities wishing to deploy this kind of capability.

Desired slot length

20 minutes

Speaker release

Yes

Authors: Dr CROOKS, David (UKRI STFC); VALSAN, Liviu (CERN)

Presenter: Dr CROOKS, David (UKRI STFC)

Session Classification: Network and security

Track Classification: Networking & Security
