

# Oxford Theoretical Studies of Particles and Strings **Retreat**

**All Souls College, Old Library**  
**12 March 2024**

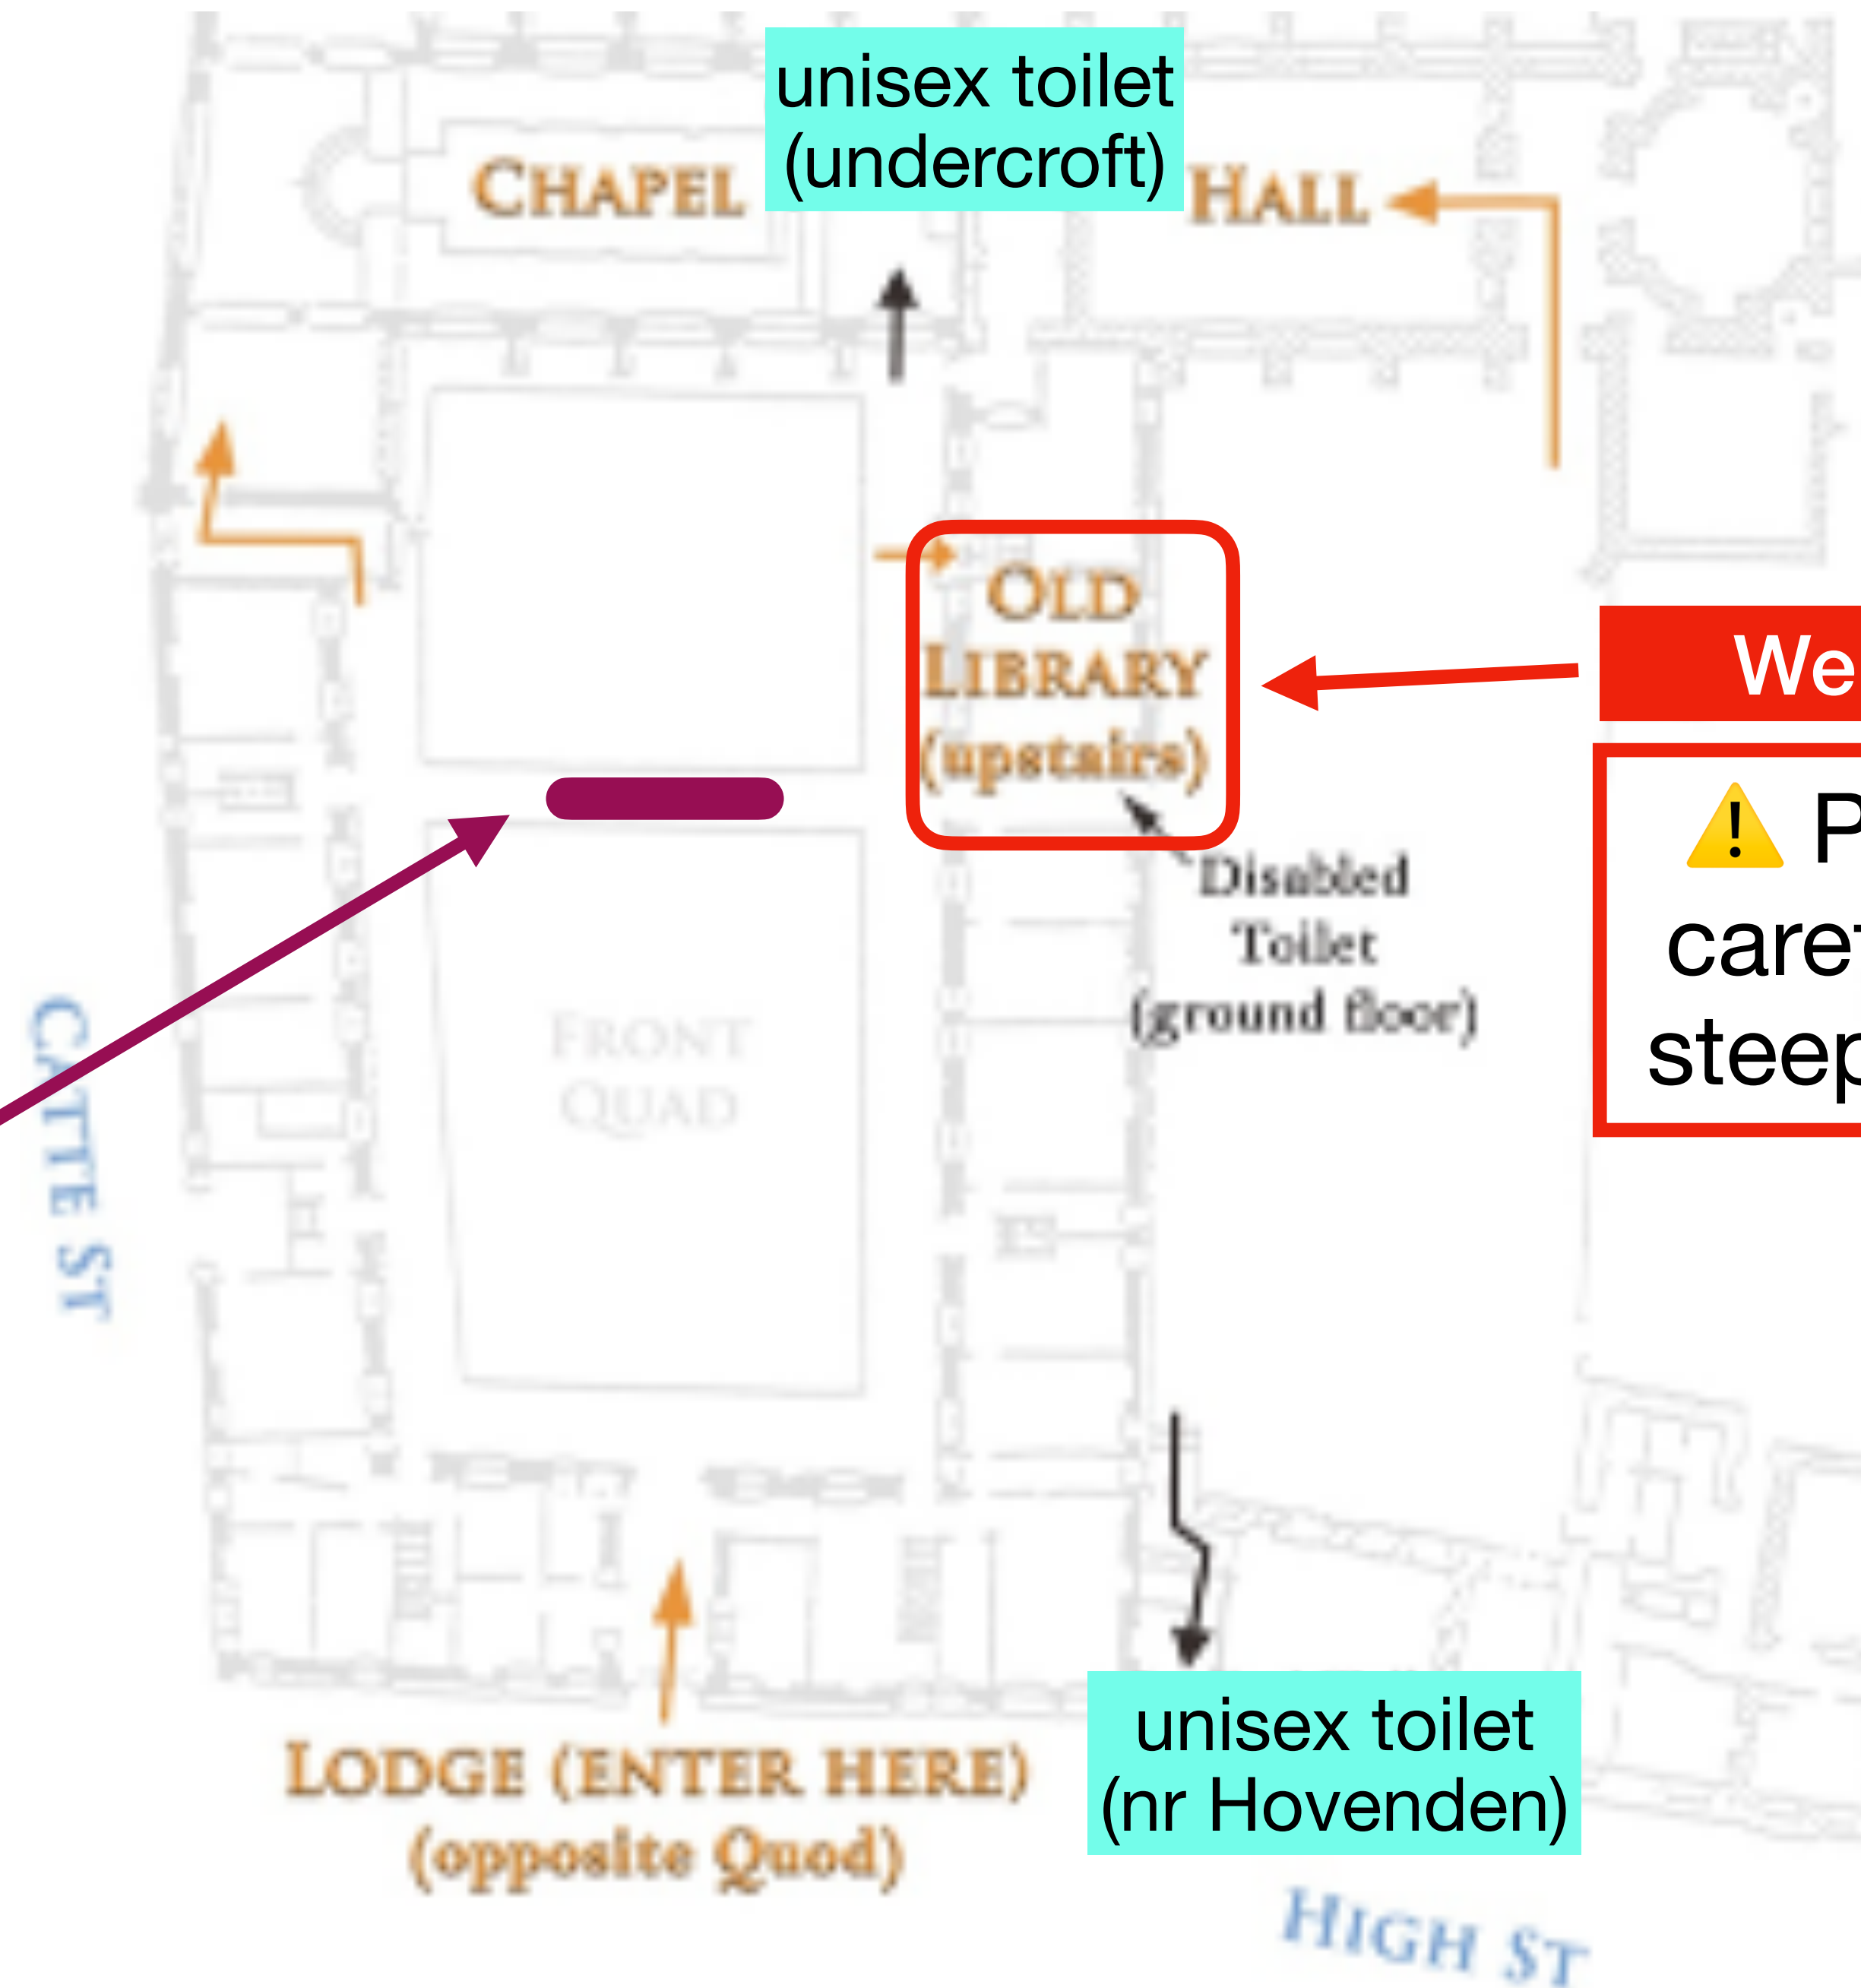

# Context: our joint STFC particle theory grant ST/X000761/1 [NB: to be acknowledged in all papers]

Several reviewers (019091065, 01934938, 040874021, 042532813, 146804013, 17965521) have commented on the **importance of further fostering scientific exchanges and collaboration between different team members and science areas**. *There are numerous contexts where such interactions already take place, notably in the extensive seminar series, which have participation from both departments, and a wide variety of research subjects, and through the presence of members of the application jointly between different science areas.* However, the reviewers' comments have encouraged us to further think through this question. As a result, we now plan to **supplement these informal opportunities with an annual retreat** bringing together the particle theorists from the Mathematics Institute and Department of Physics, whose **purpose will explicitly include evaluating broad-based and collective progress, and identifying opportunities for further collaboration.**

# Practical info

No smoking or vaping anywhere on college grounds (indoor or outdoor)

meeting point if fire alarm

unisex toilet (undercroft)

OLD LIBRARY (upstairs)

We are here

! Please be careful on the steep steps !

unisex toilet (nr Hovenden)

LODGE (ENTER HERE) (opposite Quod)
