# 1st FPGA Developers' Forum Meeting Remarks

CERN - 11-13 June 2024
Francesco Gonnella - University of Birmingham UK
on behalf of the FDF organising team
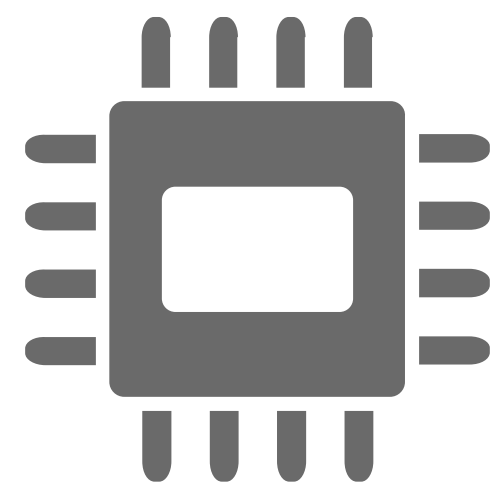

FDF 2024: some numbers

- **197** registered participants
  - **137** CERN users, **60** not CERN users
  - **160** from Academia, **37** from industry
- **131** in person participants
  - Plus **at least 2** intruders
  - **79** people eating together
- **114** connected to the webcast (peak)
- **69** submitted abstracts, **30** accepted
  - **9** algorithms, **11** tools, **5** HDL cores, **5** solutions
 - **18 hours** talking time
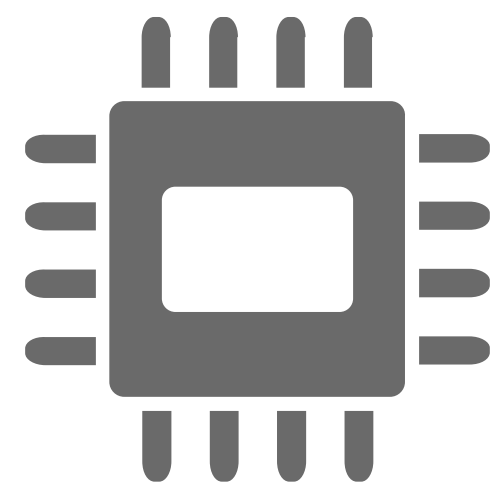

Good-looking FPGA developers
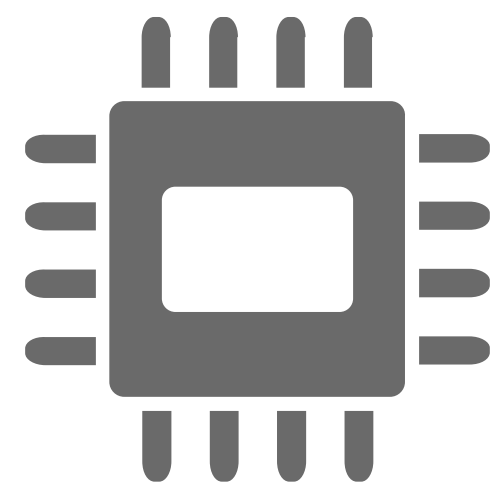

Good-looking FPGA developers

# Good-looking FPGA developers

Well-fed FPGA developers

FDF 2024: (my) impressions

- **Great quality** talks, good details and **well delivered**

- The atmosphere felt very **friendly**

- People looked **interested** in the talks and **Q&A** was very interesting

  - Often, I wished there was **more time**

- People were **happily chatting** during coffee breaks, hopefully, it won't end there!
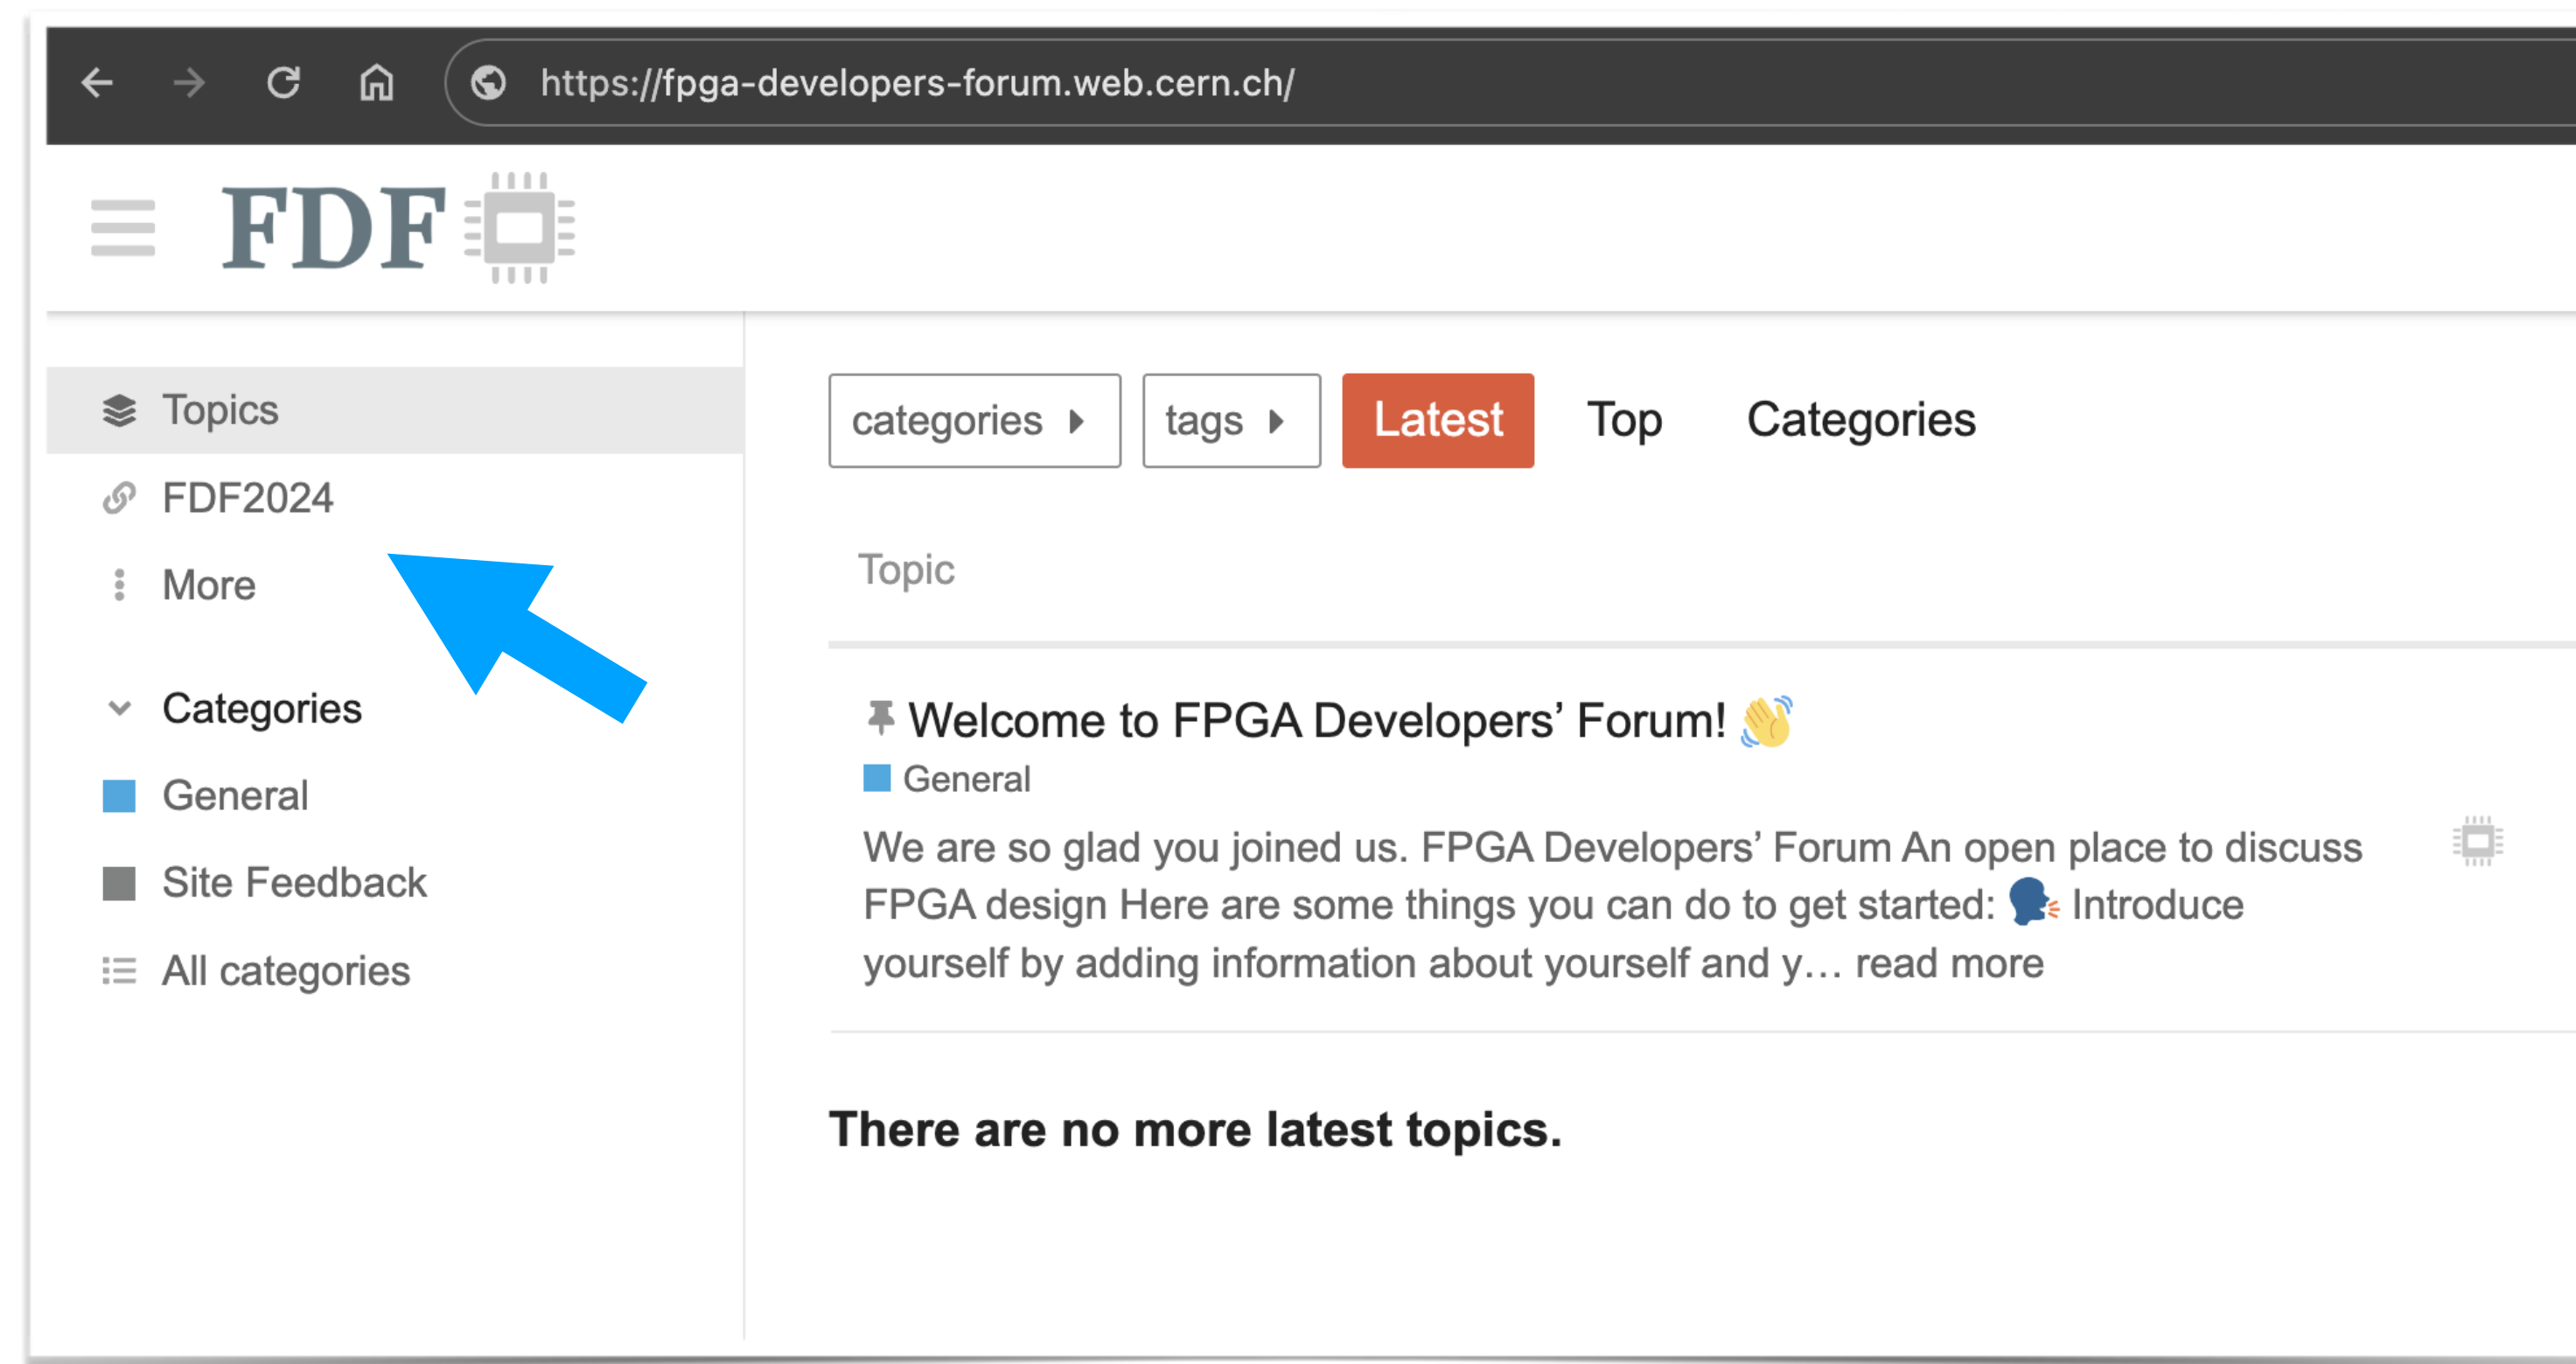

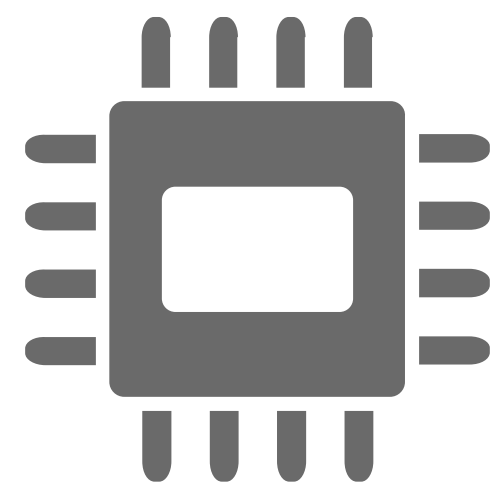

The FPGA Developers' Forum

The forum's goal is to create an **open community** of FPGA developers from any background.

This meeting was only the beginning… now let's keep the community alive!

Use the **online open forum** to discuss all the aspects of FPGA programming.

FDF website: https://cern.ch/fdf will point to the forum. **Up-to-date links** will be in the **side bar.**
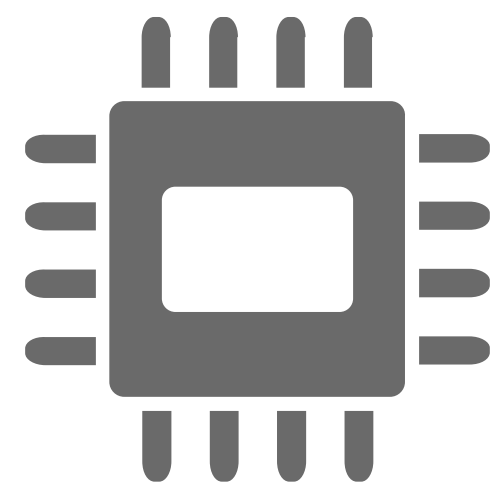

FDF newsletter

We will keep you **up to date** with our **newsletter (register here!)**.

All the **participant** of FDF2024 **will be added** (let us know if you don't want to).

Send us a message at fpga.developers.forum@cern.ch and (after moderation) we will **forward it to the community**.

We can share FPGA related **news**, upcoming **events**, opening **positions**, etc.
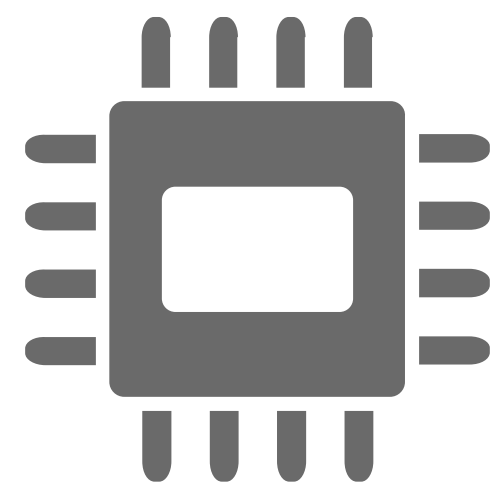

FDF seminars

Regular seminars will be held during the year. The talk will be done with the same spirit of this meeting: **detailed**, **open**, **friendly**. Plenty of time for discussion will be foreseen.

As a first step, we will get in touch with the authors of the high-quality talks that couldn't make it to FDF2024 meeting because of time.

Send us a message at fpga.developers.forum@cern.ch if you'd like to present something!

FDF annual meeting
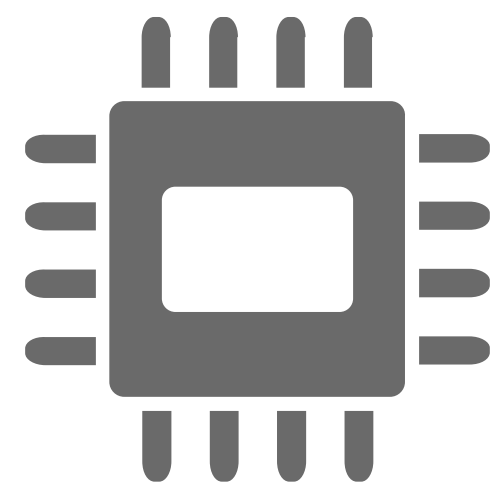

We are already thinking about **FDF2025**…

As we had **plenty of abstracts** this year, maybe we should spend one more day together?

Please fill in the **survey** on the conference website, let's **improve this meeting**!

We will let you know, stay tuned…

Many many thanks to our sponsors
