Type: **Talk**

【24】 Questions in Theoretical Cosmology

Thursday 12 September 2024 09:45 (45 minutes)

I will review several open questions in Cosmology, such as the nature of Inflation and of Dark Energy, and how to address them. For example, I will focus on the primordial non-Gaussianity of the initial density fluctuations and how to further investigate it by observations of the distribution of galaxies at long distances.
