

# Multi-Boson Interactions 2024

## Wednesday 25 September 2024

### Afternoon Session 2 (16:15 - 18:15)

-Conveners: Olivier Arnaez; Olivier Arnaez

time	[id] title	presenter
16:15	[13] Overview of the modeling of polarized vector boson production (30'+15')	PELLICCIOLI, Giovanni
17:00	[12] Diboson Polarization - ATLAS (30'+15')	LU, Miaoran
17:45	[14] Loop corrections to the production of polarized diboson (20'+10')	HAITZ, Christoph

# Thursday 26 September 2024

## Afternoon Session 2 (16:15 - 18:00)

-Conveners: Alejo Nahuel Rossia

time	[id] title	presenter
16:15	[23] SMEFT view from every angle: angular observables in diboson production (20'+10')	EL FAHAM, Hesham
16:45	[22] Study of CP violating EFT operators with the ATLAS detector	BOUDET, Leo
17:15	[24] Combined (SM, H, top) EFT fits - ATLAS & CMS (30'+15')	STAGER, Fabian
