

Data Visualization in HEP

... or histogramming and more histogramming

Andrzej Novak

06/20/2024

USCMS/IRIS-HEP Analysis Software Training (Princeton)

About & Outline

About Me

- Postdoc at MIT
 - Previously at RWTH Aachen
- CMS Common Analysis Tools
 - DPROC (Data Processing Tools) L3
 - Part of initiative for standard CMS color scheme
- **mplhep**
 - author and maintainer

Outline

- Links and Resources
- CMS Colors and Figure Guidelines

Live Jupyter tutorial

- Quick matplotlib, mplhep, hist demo
- Histogramming in practice
- Bonus: extended examples

Links and Resources

- CMS CAT Documentation (Work in Progress but already helpful)
 - <https://cms-analysis.docs.cern.ch/>
- CMS-Talk Cat
 - <https://cms-talk.web.cern.ch/c/physics/cat/274>
- `hist` documentation
 - <https://hist.readthedocs.io/en/latest/>
- `hist` documentation part 2! – UHI (universal histogramming interface)
 - <https://uhi.readthedocs.io/en/latest/>
- `mplhep` documentation
 - <https://mplhep.readthedocs.io/en/latest/>
- `matplotlib` documentation
 - <https://matplotlib.org/>
- Stack Overflow!

CMS Official Plotting Guidelines

- CAT documentation to replace old TWikis ([FigGuidelines](#))
 - <https://cms-analysis.docs.cern.ch/guidelines/plotting/general/>
 - Now featuring demo snippets for both Python and ROOT
- Updated font recommendation
 - Fonts: Helvetica (ROOT), Tex Gyre Heros (python) - open Helvetica clone
- **Plots in both python and ROOT should look the same!**
 - And should look the same regardless of OS used to produce them
 - PyROOT package available on [github.com](#) and [PyPI](#) as “cmsstyle”

```

In-frame
Python  ROOT
hep.cms.label("Preliminary", loc=2, ax=ax)

Out-of-frame
Python  ROOT
hep.cms.label("Preliminary", loc=0, ax=ax)

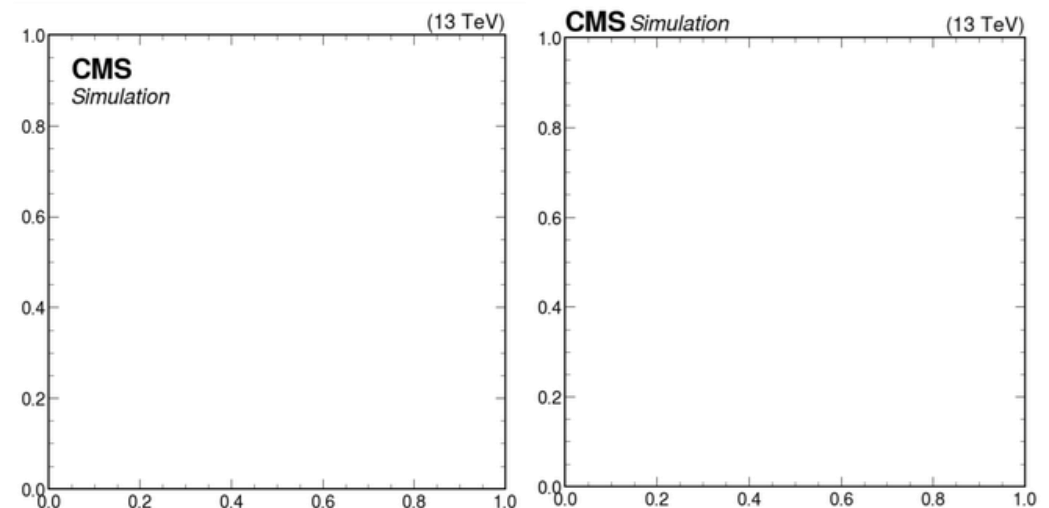

```

```

In-frame
Python  ROOT
CMS.SetExtraText("Simulation Preliminary")
CMS.SetLumi("")
canv = CMS.cmsCanvas('', 0, 1, 0, 1, '', '', square = CMS.kSquare, extraSpace=0.01)

Out-of-frame
Python  ROOT
CMS.SetExtraText("Simulation Preliminary")
CMS.SetLumi("")
canv = CMS.cmsCanvas('', 0, 1, 0, 1, '', '', square = CMS.kSquare, extraSpace=0.01)

```

CMS Accessible Color Scheme

- Unify plot look for better CMS branding
- Choose color schemes for **colorblind accessibility**
 - Joint effort of **CMS Diversity Office**, PC, PubComm & CAT
 - Evaluated according to [arxiv:2107.02270](https://arxiv.org/abs/2107.02270)
 - Result of a CMS-wide vote
- Sequential color-schemes already well established
 - Default to “viridis”

```
sns.color_palette("rocket", as_cmap=True)
```

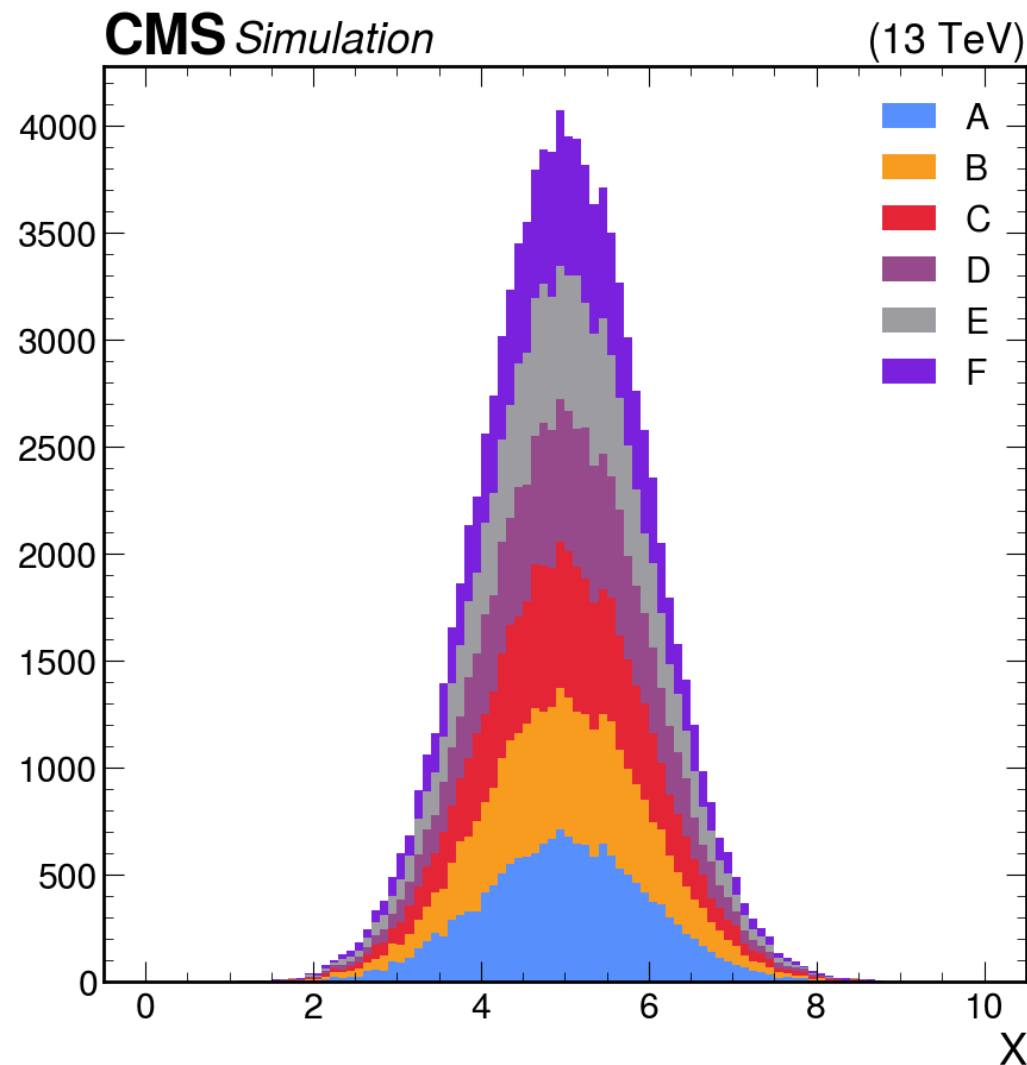

```
sns.color_palette("magma", as_cmap=True)
```

```
sns.color_palette("mako", as_cmap=True)
```

```
sns.color_palette("viridis", as_cmap=True)
```

Live Demo
