

7th General Meeting of the LHC EFT Working Group

Tuesday, 23 April 2024 - Wednesday, 24 April 2024

CERN

Book of Abstracts

Contents

Two-loop RGEs from geometry	1
MFV Hilbert Series (Remote)	1
Going beyond EFT	1
HEFT matching / matching 2HDM	1
New developments in automated and functional matching	1
MatchmakerEFT: Present & Future	1
SIMUnet	1
ATLAS fitting infrastructure	2
CMS fitting infrastructure	2
Machine enhanced CP asymmetries (Remote)	2
ML-informed STXS	2
Recent LHCb results in $b \rightarrow c\ell\bar{\nu}$ and $b \rightarrow s\ell\ell$	2
CMS Flavour Measurements of interest for EFT fits	2
B-Physics EFT in ATLAS	3
Quartic anomalous coupling studies using intact protons at the LHC (Remote)	3
Towards a truly global SMEFT analysis without flavor assumptions	3
Model interpretation of triple gauge neutral couplings	3

EFT Session / 48

Two-loop RGEs from geometry

Corresponding Author: luca.naterop@physik.uzh.ch

RGE calculations in EFTs can be carried out efficiently in a geometric picture, where field redefinitions are just coordinate changes. Building on an old method introduced by 't Hooft in 1973, we extend the geometric formulation for scalar theories to the two-loop order and derive the counterterms which renormalize the theory at two loops. As applications of our results, we derive the two-loop counterterms and RGE for the $O(n)$ EFT to dimension six, the scalar sector of the SMEFT to dimension six, and chiral perturbation theory to order p^6 .

EFT Session / 49

MFV Hilbert Series (Remote)

Corresponding Author: pquilezlasanta@ucsd.edu

EFT Session / 50

Going beyond EFT

Corresponding Author: veronica.hirn@gmail.com

EFT Session / 51

HEFT matching / matching 2HDM

Corresponding Author: duartefontes@tecnico.ulisboa.pt

EFT Session / 52

New developments in automated and functional matching

Corresponding Author: anders.thomsen@unibe.ch

EFT Session / 53

MatchmakerEFT: Present & Future

Corresponding Author: pablo.olgosoruiz@unipd.it

EFT Session / 54

SIMUnet

Corresponding Author: ubiali@hep.phy.cam.ac.uk

EFT Session / 55

ATLAS fitting infrastructure

Corresponding Author: andrea.visibile@cern.ch

EFT Session / 56

CMS fitting infrastructure

Corresponding Author: giacomo.boldrini@cern.ch

EFT Session / 57

Machine enhanced CP asymmetries (Remote)

Corresponding Author: akanksha.bhardwaj@okstate.edu

EFT Session / 58

ML-informed STXS

Corresponding Author: migarfol@ific.uv.es

EFT Session / 60

Recent LHCb results in $b \rightarrow c l \bar{\nu}$ and $b \rightarrow s l l$

Corresponding Author: julian.garcia.pardinas@cern.ch

EFT Session / 61

CMS Flavour Measurements of interest for EFT fits

Corresponding Author: dmytro.kovalskyi@cern.ch

EFT Session / 62

B-Physics EFT in ATLAS

Corresponding Author: pavel.reznicek@cern.ch

EFT Session / 63

Quartic anomalous coupling studies using intact protons at the LHC (Remote)

Corresponding Authors: c.baldenegro@cern.ch, christophe.royon@cern.ch

EFT Session / 64

Towards a truly global SMEFT analysis without flavor assumptions

Corresponding Author: tomtong2015@gmail.com

EFT Session / 65

Model interpretation of triple gauge neutral couplings

Corresponding Author: veronica.hirn@gmail.com
