

## Open discussion on HEP-SPEC06

*Tuesday, October 25, 2011 2:30 PM (40 minutes)*

The HEP-SPEC06 benchmark was designed by a working group born during the HEPiX meeting in JLAB. The HS06 is now the standard for measuring computing power in HEP and also in other scientific areas that make use of Computing GRID.

The goal of this discussion is to understand how the HEPiX community sees the future of HS06.
