

AMD's New 16-core Opteron Processors

Tuesday, October 25, 2011 9:00 AM (1 hour)

An overview of the architecture and power efficiency features of the latest 16-core processors from AMD including benchmark results for the HEP-SPEC suite -- showing the performance improvements over the current 12-core and older 6-, quad-, and dual-core processors. AMD's newest Opteron processors feature the "Bulldozer" x86 core pair compute module which is especially well-suited for modern C++ and object-based language workloads.
