# Experience between AMORE/Offline and subsystems 

Francesca Bellini<br>DQM / QA session @ ALICE offline week CERN, 15 th July 2011

## Experience between AMORE/Offline and sub-systems ...or at least some of it...

DQM interaction with detector's experts
-Troubleshooting
-Code update
-Documentation
-Status summary tables
Detector's experts interaction with DQM
-Retrieving infos about QA

- Interaction with the shifters
-Detectors requests

## DQM interaction with detector's experts

- Troubleshooting
- Problems with AMORE agents at P2 not promptly solved
- to be improved!
- Troubleshooting sessions with Barto + detector's experts to solve issues
- already in place
- good idea, it increases everyone's knowledge of the system!
- Update of the code
- Test machine are set up and detectors have access to them
- Need to fasten detector's reaction / solution to problems
- Savannah bugs will be opened
- Satisfactory response from detectors about trigger classes implementation
- Thanks to Ruben for changes to the code core
- Now it's detector's responsibility to complete implementation...
- Support still needed from the offline (Ruben?)

Documentation exists, links have been provided

## DQM interaction with detector's experts

- Documentation
- All detectors have been asked to provide good documentation for the shifters
- Instructions in the Twiki OK in general for p-p and Pb-Pb runs
- still missing instructions for Cosmic and Technical runs + screenshots
- Most of the detectors documentation is up-to-date
- Missing detector's blackboard for temporary issues, only a general one
- Still missing AMORE GUI descriptions for some detectors
- Still missing alarms and thresholds
- Current status reported in the next summary slides
- Waiting for the output of the review by RC + volunteers of detector's pages

## TWiki update status

| DETECTOR | Last update | DETECTOR | Last update |
| :---: | :---: | :---: | :---: |
| ACORDE | May 2011 | SSD | Oct 2010 |
| DAQ | Jun 2011 | T0 | May 2011 |
| EMCAL | May 2011 | TOF | Jun 2011 |
| FMD | Jul 2011 | TPC | May 2011 |
| HMPID | Jun 2011 | TRD | May 2011 |
| MUON | Jun 2011 | V0 | Mar 2011 |
| PHOS | Apr 2011 | ZDC | Mar 2011 |
| PMD | Nov 2010 | Vertex (SPD) | May 2011 |
| SPD | Jun 2011 | HLT | June 2011 |
| SDD | Jun 2011 | Trigger | new - to be <br> added |

## General Status summary

＋＝blackboard in detector page
new
X＝do not monitor

| Status on 27/06/2011 | $\underset{\sim}{8}$ | $\frac{d}{4}$ | 忘 | $\sum_{i}$ | 雨 | $\sum_{i}^{U}$ | $\stackrel{y}{y}$ | $\begin{aligned} & \text { O } \\ & \underset{\sim}{2} \end{aligned}$ | $\sum_{a}$ | 伶 | $\stackrel{0}{6}$ | ज | $\bigcirc$ | $\stackrel{\square}{O}$ | $\begin{aligned} & u \\ & \hat{F} \end{aligned}$ | $\stackrel{\otimes}{\underset{y}{2}}$ | 9 | $\stackrel{\cup}{\mathrm{N}}$ | $\begin{aligned} & \times \\ & \text { x } \\ & y \\ & y \\ & \hline \end{aligned}$ | $\stackrel{\leftarrow}{\underset{y}{\mid c}}$ |  | ${ }_{\text {N }}^{\sim}$ |

| Provide GUI description |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Set thresholds／alarm s |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |
| Agents pending issues |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |  |

## Detector's experts interaction with DQM

- How they can retrieve infos about QA
- Online
- look in the DQM tab in the logbook for the summary image
- Possible to download AMORE files of archived objects to inspect ROOT files containing the DQM plots
- if objects are not there, report to the DQM experts (archiving problems)
- Read the DQM end of shift reports
- Offline
- Check summary images in the logbook and set quality flags for detector
- Partecipate to the QA offline meetings -> combine infos from all detectors
- Check the Run Condition table

## Detector's experts interaction with DQM

- Interaction with DQM Shifters
- interaction with the shifters
- To be improved from both sides (shifters+experts)
- Inspect carefully the DQM end of shift report
- Some reports are very good and detailed, some very poor -> still room for improvement
- shifters have examples
- If report is not satisfactory, detector's experts should go back to the shifter or add entries in the logbook to complete the report
- Requests from detectors
- E-mails were sent to ask for specific needs / requests to the offline before this meeting but very few answers
We do our best, but partecipation of the detectors is needed to come up with new ideas and improvements and to satisfy the needs!

## Thank you...
