RAW OCDB in simulation for TPC

- TPC group considers to use RAW OCDB in simulation

    - Philipp Luettig (supervisor - Marian Ivanov)

- Road map

    - Event time stamps usage in simulation

        - TPC performance is changing within one run

    - Implement decalibration/calibration of space points (relatively easy)

    - Implement decalibration/calibration of TPC gain and dEdx

        - Complex problem

        - Require input from the new gain calibration procedure (work ongoing)

- Time scale 2-4 months

    - Concerning dE/dx not guarantee to be fully successful

    - More realistic time lines in middle of August
