

Welcome to NIKHEF Amsterdam

- You know how everything seems to be predicted years ahead by the Simpsons – well, guess what

Welcome to NIKHEF Amsterdam

About the program

- Thanks to Mary and her team at NIKHEF to make it happen !
- We tried to come up with themed blocks but reality did strike a bit and scheduling got more complicated than usual – Chris did make a brilliant job out of it, also as usual
- The more open-to-discussion part is deliberately at the beginning of the workshop as Myron is leaving us at wednesday noon
- We have two interactive blocks today
 - Round the room introduction before coffee break
 - There will be no recording, zoom access etc. it all stays in the room ;)
 - Town hall discussion at the end of the day
 - Overlay Batch Systems - who uses them, examples, ...
 - Most likely culprits you blame when HTCondor behaves poorly
 - Centos 7 to Centos 9 Upgrades
 - What do you need from HTCSS in the next couple upcoming years?
 - ???

10th birthday of this workshop

And some condor trivia

- Condor – neither the biggest nor the most beautiful one out there but the Max Planck institute did some research on the species and it turns out it is the most effective bird
 - Can fly up to 170 km or 5h without a single flap of the wing

10th birthday of this workshop

And some condor trivia

- First workshop at CERN as a pre-GDB meeting in 2014
- 2016 ALBA (together with ARC-CE)
- 2017 DESY (Hamburg)
- 2018 RAL

10th birthday of this workshop

And some condor trivia

- 2019 Cuneo
- 2023 IJCLAB
- 2024 NIKHEF
- Let's continue and keep the spirit of the workshop alive with lots of interruptions, discussions, opinions, surprises and social interaction !
