

Status of R&D on ion sources at IPNO

Monday 27 June 2011 16:50 (20 minutes)

In the framework of European projects for future facilities and for the operation of ALTO facility, IPNO achieves various studies and developments on ion sources.

For Spiral2 project, IPNO develops a plasma ion source called IRENA. For the ALTO facility, in collaboration with CERN, IPNO starts up the operation of a laser ion source.

For EURISOL project, IPNO has submitted a NuPNET proposal: the EURIMIS project.

The status of these works and the resources involved will be described.

Author: Dr LAU, Christophe (IPN Orsay)

Co-author: Dr CHEIKH MHAMED, Maher (IPN Orsay)

Presenter: Dr LAU, Christophe (IPN Orsay)

Session Classification: Ion sources R&D
