

Injector MDs week 35

- PSB & PS MDs ongoing
- SPS MDs:

Change of plan in week 35 following request to intervene on t4 wobbling magnet

W34: No MDs (LHC MDs)

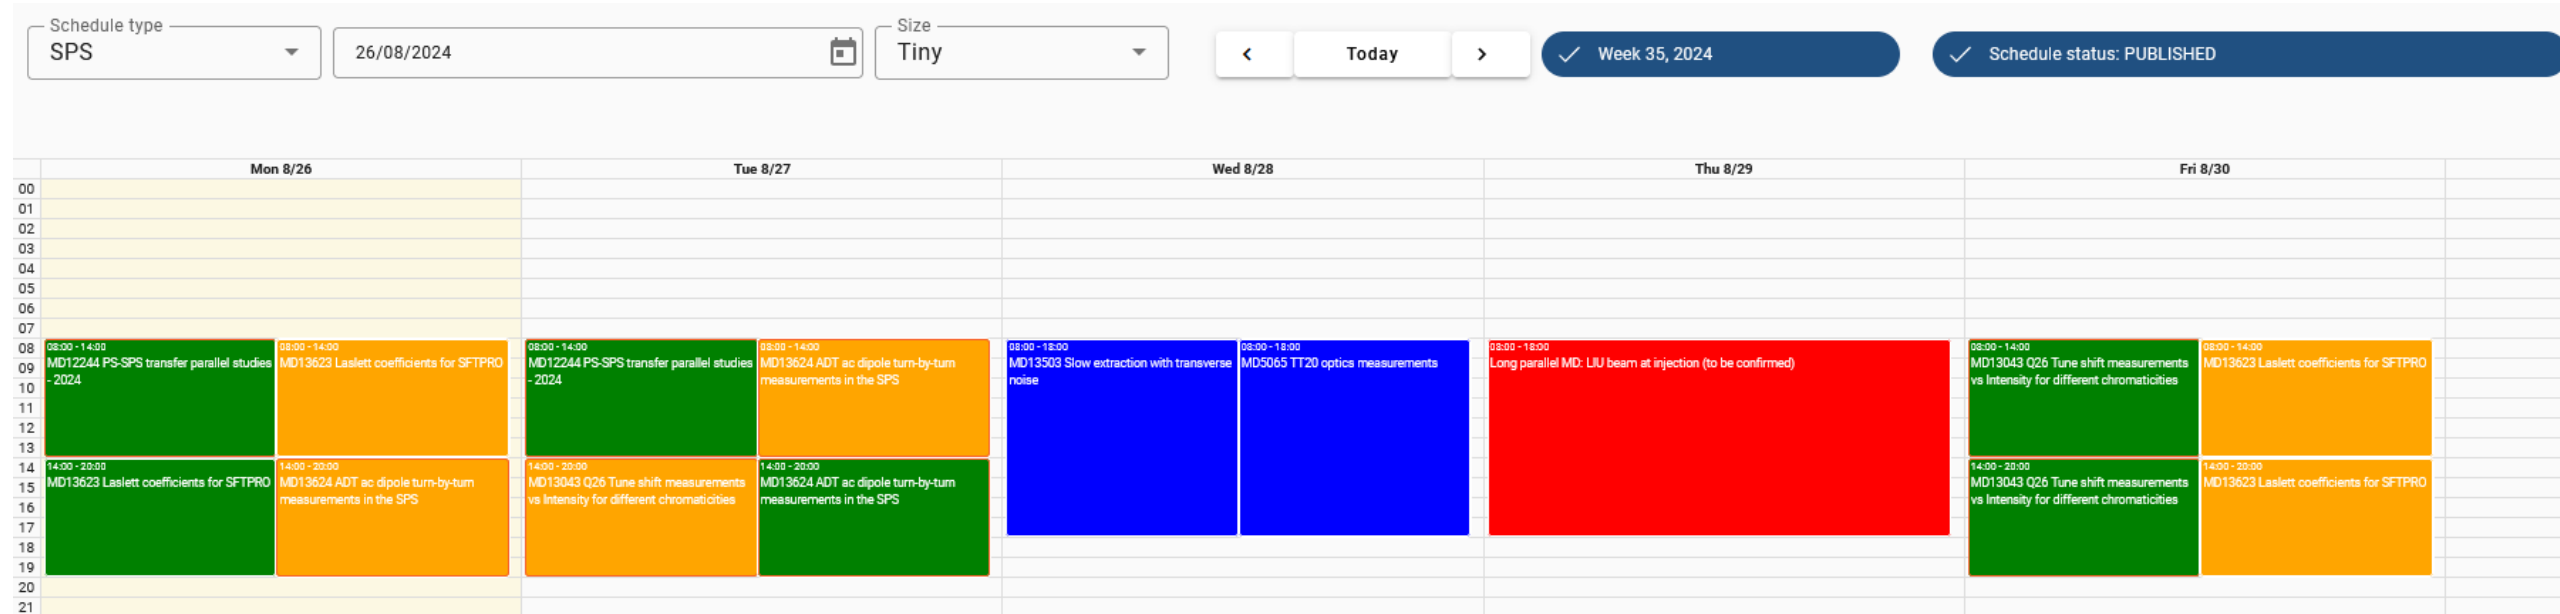

W35: Crystal shadowing (beam to TT20 TED)

W36: hysteresis compensation MD (no beam to North Area)

W37: Crystal shadowing

W39: Slow extraction with transverse noise + TT20 optics (beam to P42)

SPS short parallel MDs

Considering difficulties to optimize simultaneously the SFTPRO following two different short parallel MD users (+AWAKE) in SPS:

- Decision in agreement with SPS-OP

→ The spare user will only be included in the SPS supercycle if the main user is absent/is finished, or in exceptional circumstances.
