

# **Review of Day 3**

# After falling walls, raising walls again!

- Entering a new period of sanctions, and conflicts
- Like in the cold war, IUPAP has the role of keeping the community together, encourage worldwide participation to conferences, freedom to collaborate, freedom to travel and exchange (push for open data, open science) together with responsibility (having in mind contributing to a better world: equitable on a healthy planet!, and having to cope with constraints coming from the funding agencies!)
- Visas are an issue (conference reports should include visa issues) → ISC (International Science Council) could be very useful
- Displaced scientists are also an issue
- Avoid political statements **but contribute to general understanding**
- Organize a worldwide attended conference on physics for “regenerative” development: equitable well-being on a healthy lively planet, in 2027 together with the GA, is an option. Place a call, need fundraising

# Centenary, iybssd, idssd

- Thanks to Monica and Roberto
- The centenary celebration and book is a unique legacy
- **IUPAP contributing to the general understanding is a strong message for today**
- **IUPAP ga 2027 conference part of IDSSD is an option**

Michel

# Gender Gilian

- Slow improve
- Should we be more strict? No sponsoring if IOC < 10% (responsibility of CC), strong incentive for LOC
- Travel assistance, waiving or reducing fees for developing or disadvantaged countries essential
- SCGES very useful
- WG5, ICWIP a flagship activity with huge impact for our members and beyond
- Waterloo charter, a reference

# Communication Sandro

- Ramping up
- Newsletter, social media (good, room for improvement) very important for our members
- Commissions should contribute more
- Outcome of General Assembly
- Have in mind: Assist in the worldwide development of physics, help in the applications of physics towards solving problems of concern to humanity. IUPAP contributes to general understanding
- Increase the budget for communication
- Thanks to the team

# varia

- OK for prof. Rajesh Gopakumar for Gruber prize award committee [Michel](#)
- Help SESAME, LAAAMP [Sandro](#), [Kuijuan](#), [Sekazi](#)
- Interdisciplinary prize: interdisciplinary (with strongest part physics in it) preferably connected to quantum or/and sustainability [Sunil](#), [Sandro](#)
- IQ photo contest, WG will coordinate activities [WG19](#)
- First EC&CC in the IUPAP cycle (February 2025), second (October 2025), and third (October 2026)—all organised online from Geneva. EC&CC in person in October 2027, back to back with GA—possibly in Africa together with a worldwide conference, possibly organized by WG21 on Physics for regenerative development. [Silvina](#)
