Hadronic Showers in Geant4 **11.2.ref02**

G. Folger, D. Konstantinov, A. Ribon
CERN EP-SFT

Main Hadronic Changes in G4 11.2.ref02 vs. ref01

- *hadronic/cross_sections/*
 - *G4NeutronCaptureXS* : set to 10^{-5} eV the lowest energy limit
 - Below this, no computations are performed to avoid numerical problems
 - *G4NeutronInelasticXS* : implemented the $1/v$ behavior for the cross section below 10^{-5} eV
 - Only in the case that there is no threshold value (below which the cross section is 0.)
- *hadronic/models/particle_hp/*
 - *G4CrossSectionHP* : fixed temperature dependence;
fixed elastic and capture cross sections for Ar (use only the main natural isotope ^{40}Ar);
fixed cross sections for rare target atoms (Promethium, Astatine, Radon, Francium)
 - *G4ParticleHPFSFissionFS*, *G4ParticleHPFissionBaseXS* : technical fixes
- *hadronic/models/radioactive_decay/*
 - *G4BetaPlusDecay*, *G4BetaMinusDecay* : added extra numerical protection at the level of 1 eV to avoid precision loss and production of neutrino with negative kinetic energy. Fixed sampling algorithm: addressing problem report #2588.

Crashes & Warnings

- No crashes
- No infinite loops
- No new warnings

Reproducibility

- OK in all cases

Pion- showers: FTFP_BERT

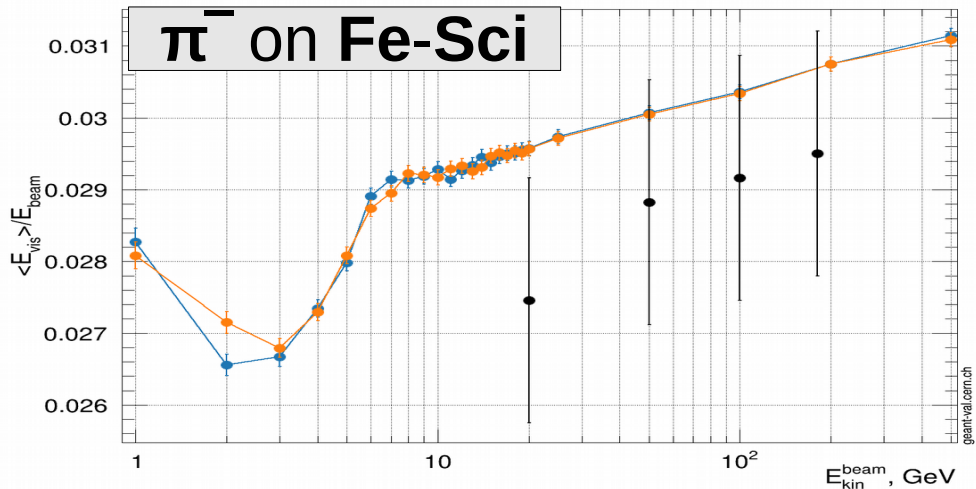

G4 11.2.ref01

G4 11.2.ref02

*Note : conventional Birks treatment
(easier and no experimental h/e to fit !)*

Energy Response

Energy response | Beam: pi- | Target: TileCal

Energy response | Beam: pi- | Target: AtlasHEC

Energy response | Beam: pi- | Target: AtlasFCAL | FTFP_BERT

Energy response | Beam: pi- | Target: AtlasECAL | FTFP_BERT

Energy Width

Normalized width | Beam: pi- | Target: TileCal | FTFP_BERT

π^- on Fe-Sci

Normalized width | Beam: pi- | Target: AtlasHEC | FTFP_BERT

π^- on Cu-LAr

Normalized width | Beam: pi- | Target: AtlasFCAL | FTFP_BERT

π^- on W-LAr

Normalized width | Beam: pi- | Target: AtlasECAL | FTFP_BERT

π^- on Pb-LAr

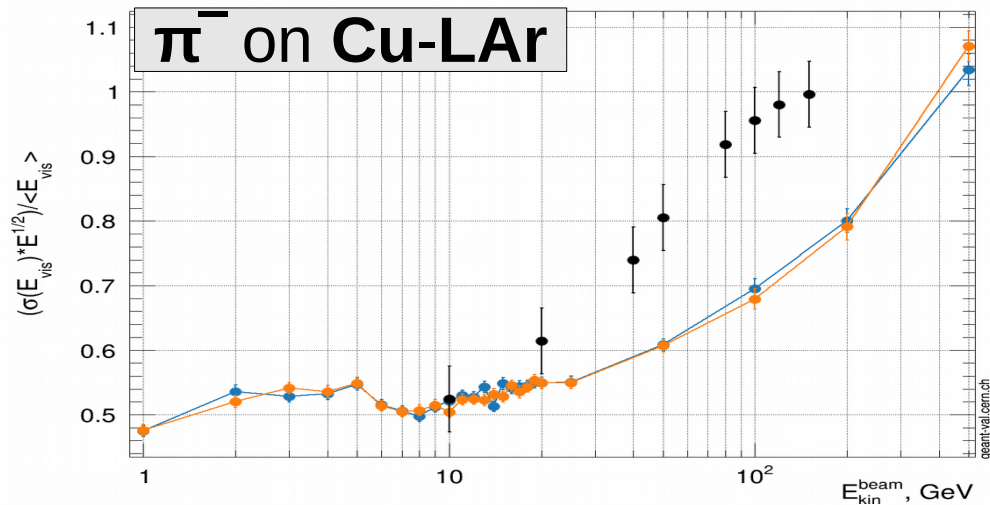

Energy Resolution

Energy resolution | Beam: pi- | Target: TileCal

Energy resolution | Beam: pi- | Target: AtlasHEC

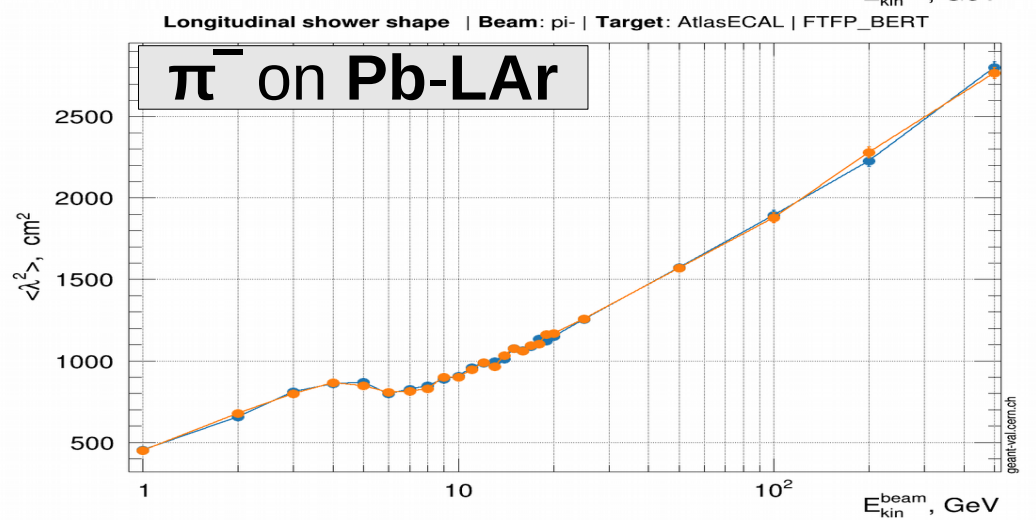

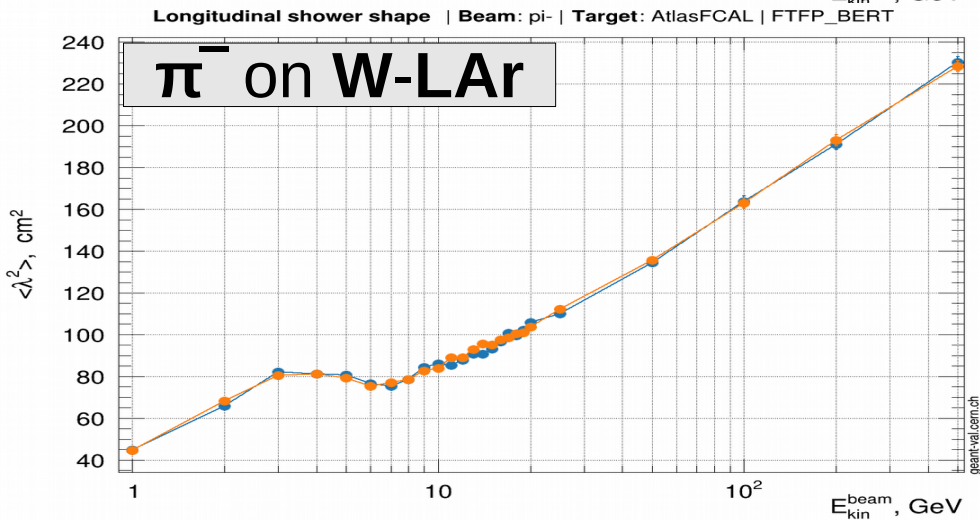

Energy resolution | Beam: pi- | Target: AtlasFCAL | FTFP_BERT

Energy resolution | Beam: pi- | Target: AtlasECAL | FTFP_BERT

Longitudinal Shape

Lateral Shape

Lateral shower shape | Beam: pi- | Target: TileCal | FTFP_BERT

π^- on Fe-Sci

Lateral shower shape | Beam: pi- | Target: AtlasHEC | FTFP_BERT

π^- on Cu-LAr

Lateral shower shape | Beam: pi- | Target: AtlasFCAL | FTFP_BERT

π^- on W-LAr

Lateral shower shape | Beam: pi- | Target: AtlasECAL | FTFP_BERT

π^- on Pb-LAr

Conclusions

- **G4 11.2.ref02**
 - No crashes, no infinite loops, no new warnings
 - Reproducibility fine in all cases
 - Hadron showers similar to those of G4 11.2.ref01, for all physics lists, as expected
