Measuring Web Services

Wednesday, 11 July 2007 11:30 (30 minutes)

Web 2.0 (whatever that means) is here and along with it has come an increased need for high-performance web services.

In this talk, I'd to discuss some ideas on how to measure the utilization and performance of Python-implemented web-services in order to:

- plan capacity
- find performance hotspots
- decide when to run around like a decapitated chicken
