Presentation "Cosmological horizons and conserved quantities"

Friday 24 May 2024 17:00 (30 minutes)

Abstract: "FLRW metric give three cosmological horizons. They tell about relations between possibility of communication and change of Universe size. It may be also shown that the Hubble horizon give a part of Universe where talking about energy conservation has a sense."

Presenter: MATYSIAK, Robert (Wrocław University of Technology)

Session Classification: Kindergarten
