Poster "The Mass And Possible Quantum Numbers of X(6900)"

Thursday 23 May 2024 10:30 (1h 15m)

Abstract: "The poster will discuss various properties of X(6900) and demonstrate and explanation of its unusual properties obtained by reducing one four-body problems into three two-body problems. Th solutions were obtained with Mathematica 12, first for charmonium spectrum, then for all-charm tetraquark spectrum which is understood as a pair of two-particle states, mesons or diquark- antidiquark states."

Presenter: KUCHTA, Morgan (University of Wrocław)

Session Classification: Kindergarten
