In April 2024, Edward and Jorgen stepped down from the IAC.  
Marek steps down starting from June 2024.

Marek proposes inviting Maja Mackowiak-Pawłowska (NA49, SHINE, experimental measurements of fluctuations) and Roberta Araldi (NA50, NA60 and NA60++, charmonia and dileptons) to the IAC. Maja and Roberta co-chair the LoC of the CERN workshop. If the proposal is accepted the modified IAC will be as follows:

Marek has served as the IAC convener.

It is proposed that a convener change be made during the IAC meetings organised during the CPOD workshops in the future. The IAC will appoint a new convener who should be unrelated to the organisation of the coming workshop. For June 2024 – May 2026, I suggest Tetyana serve as the IAC convener.
