

Wolmar Nyberg Åkerström

NBIS, SciLifeLab / ELIXIR Sweden

Biography

Wolmar Nyberg Åkerström is an IT professional at Uppsala University working for the National Bioinformatics Infrastructure Sweden (NBIS), which is the Swedish node of the life science ESFRI-RI ELIXIR. His current work is focused around data management and Open Science in European federated e-infrastructure initiatives and facilitating data sharing and reuse in Swedish life science research.

As a contributor to EOSC Association's Semantic Interoperability Task Force (2021-2023), Health Data Task Force (2024–2025), and Opportunity Area expert group on Metadata, Ontologies & Interoperability, Wolmar also brings past experiences from working in digital scholarship, scholarly communication and digital repositories for research data, academic publications, and cultural heritage. Beyond Europe, he is an active contributor to and advocate of the Research Data Alliance's (RDA) activities and currently serves as member of its Technical Advisory Board and co-chair for its Life Science Data Infrastructures Interest Group.
