Tibor Kálmán

GWDG, ePIC

Biography

Dr. Tibor Kálmán is an IT professional at GWDG, Germany. Tibor is Chair of the Management Board of ePIC ('PID Consortium for eResearch'), as well as Vice-Chair of the Joint Research Committee of DARIAH-ERIC. He co-chaired the former 'PID Policy and Implementation' Task Force of EOSC-A. Tibor joined GWDG in 2005 and contributed on several international infrastructure and data management projects with the aim to build up research environments for various disciplines.

Tibor holds a PhD in Computer Science from the University of Göttingen. His teaching activities included the theory and practice of distributed systems, parallel computing, and data management. His current research focuses on (1) distributed computing paradigms, (2) automated system deployment, and (3) research data management, including persistent identifiers. He also has 20+ years of experience as an independent IT consultant specializing in small and medium-sized enterprises.
