

Sumithra Velupillai

Swedish Research Council

Biography

Dr. Sumithra Velupillai is a Senior Research Officer at the Swedish Research Council (Strategic Data Resources, Department of Research Infrastructures). Her main responsibilities include working on national and international government assignments related to open science, including EOSC (both EOSC Steering Board and EOSC-A).

Dr. Velupillai has a PhD in Computer and Systems Sciences from Stockholm University, Sweden, specializing in applied Natural Language Processing/data science/AI mainly in the health domain. Her research projects focused on method development for automated information extraction from large data resources such as health care records and social media data with the aim to assist and improve clinical care. She has worked in and with several international, interdisciplinary research groups in e.g. the US and UK.
