Anika Erxleben-Eggenhofer

EOSC EuroScienceGateway, University of Freiburg, Germany
European Galaxy Project, Galaxy Training Network

Biography

Dr. Anika Erxleben-Eggenhofer has a PhD in plant biotechnology and is a senior scientist at the University of Freiburg, Germany. In the EOSC EuroScienceGateway project she is the lead of WP1 (Project administration & management, training), and moreover she is involved in several other EU-funded projects and NFDIs promoting open and FAIR research software. With more than 15 years of experience in the Galaxy project, she is part of the European Galaxy Team which maintains the biggest Galaxy instance in Europe. Her broad experience in training & education give Anika a major role in the Galaxy Training Network (GTN) which provides a mature infrastructure for training, materials, and education. Anika is an experienced Galaxy trainer and university lecturer with an extensive didactic background, and member of the EOSC-A Opportunity Area 5.
