

Natalie Haley

Instruct-ERIC

Biography

Dr. Haley has been an integral part of Instruct-ERIC, the European Research Infrastructure for Structural Biology, since 2017. Initially joining as a Project Manager and advancing to the role of Hub Coordinator/Head of Strategy, she has been helping to grow and develop Instruct on the European and global stage. Dr. Haley has expertise in leadership of inter-infrastructure work in projects such as CORBEL, EOSC-Life, and RI-VIS where she represented the coordinating entity.

Towards data management and the EOSC, Dr. Haley was a member of the Financial Sustainability Task force of the EOSC Association, involved in developing the proposal for the financial sustainability of the EOSC Core components. Dr. Haley is strongly involved in shaping the data management strategy for Instruct to increase the FAIRness of data generated at Instruct, taking advantage of Instruct's in-house access management system ARIA. Dr. Haley has a MPhys in physics and a DPhil in biophysics at the University of Oxford.
