

# Kasper Drazewski

Centre for IT & IP Law (CITIP), KU Leuven

## Biography

Kasper's research and policy work bridges copyright, innovation and digital regulation. Prior to joining the Center for IT and IP Law at KU Leuven as Senior Researcher last summer, Kasper's recent work in digital policy tackled the asymmetries of power and knowledge in digital societies, the resulting weakening of the democratic process and the loss of agency of individuals, including in the context of the 'digital fairness' fitness check of consumer law conducted by the European Commission.

In parallel, Kasper's book on the effects of circumscribed legislation on innovation in society, entitled 'Copyright as a constraint on creating technological value' was published by Springer earlier this year.
