

## Jens Dierkes

University and City Library of Cologne, University of Cologne

### Biography

Dr. Jens Dierkes is Deputy Head of Research and Publication Support at the University and City Library of Cologne. He is Task Area Leader "Community and Networking" and Measure Leader "Training and Education" in NFDI4Health, the National Research Data Infrastructure Initiative for Personal Health Data. A particular focus is on communicating this new infrastructure to researchers and supporting the development of their data skills. He is member of the Cologne Competence Center for Research Data Management and of the steering group of the national DINI/nestor Research Data Working Group. In the European University Alliance for Well-Being EUniWell, he is part of the Open Science Group and responsible for developing a scalable digital FAIR data training resource for the Alliance. He was also manager of the Göttingen eResearch Alliance, which established a research-supporting information infrastructure for the campus. A physicist by training, he was involved in developing the infrastructure of the European Astrophysical Observatory.
